1. Getting Started

Signing in, setting up your gym, and finding your way around.

Signing in

1. Open your gym's Avantej web address in any browser.
2. Enter your email and password, then select *Sign in*.
3. If you were invited by email, use the link in that invitation to set your password the first time.

You can also be sent a one-time sign-in link by email if you forget your password.

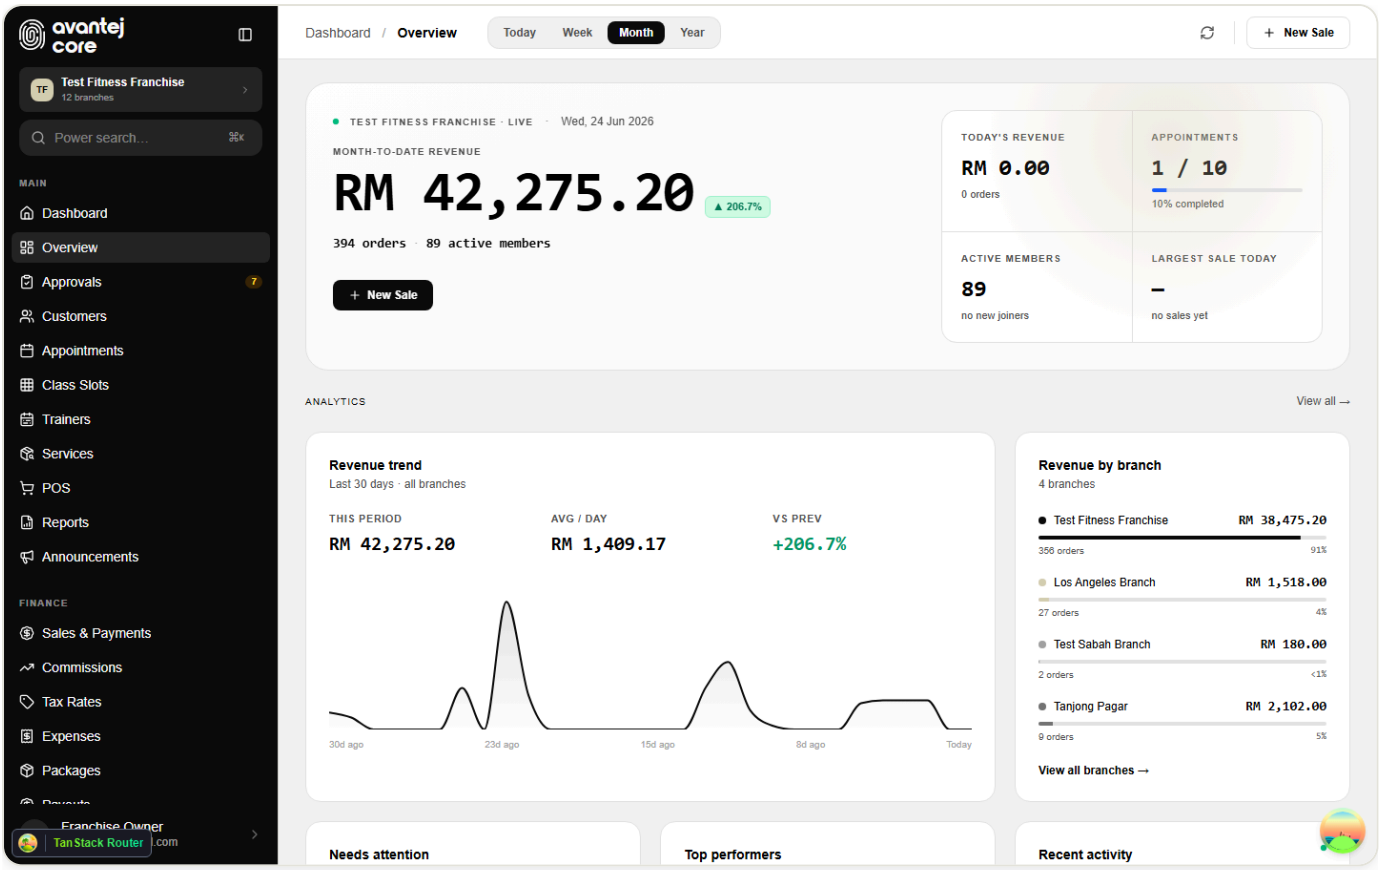

Setting up a new gym (onboarding)

When your organisation is first created, an onboarding wizard walks you through entering your gym details, branches, and first staff members. You can return to setup at any time until it is complete.

Finding your way around

- The left sidebar is your main menu — every area in this guide lives there.
- The dashboard **Overview** shows your key numbers (sales, appointments, members) for today, this week, this month, or this year.
- What you see depends on your role. A cashier sees fewer options than a manager.

> **Tip:** If you were just given new permissions and don't see a menu item, sign out and back in to refresh your access.

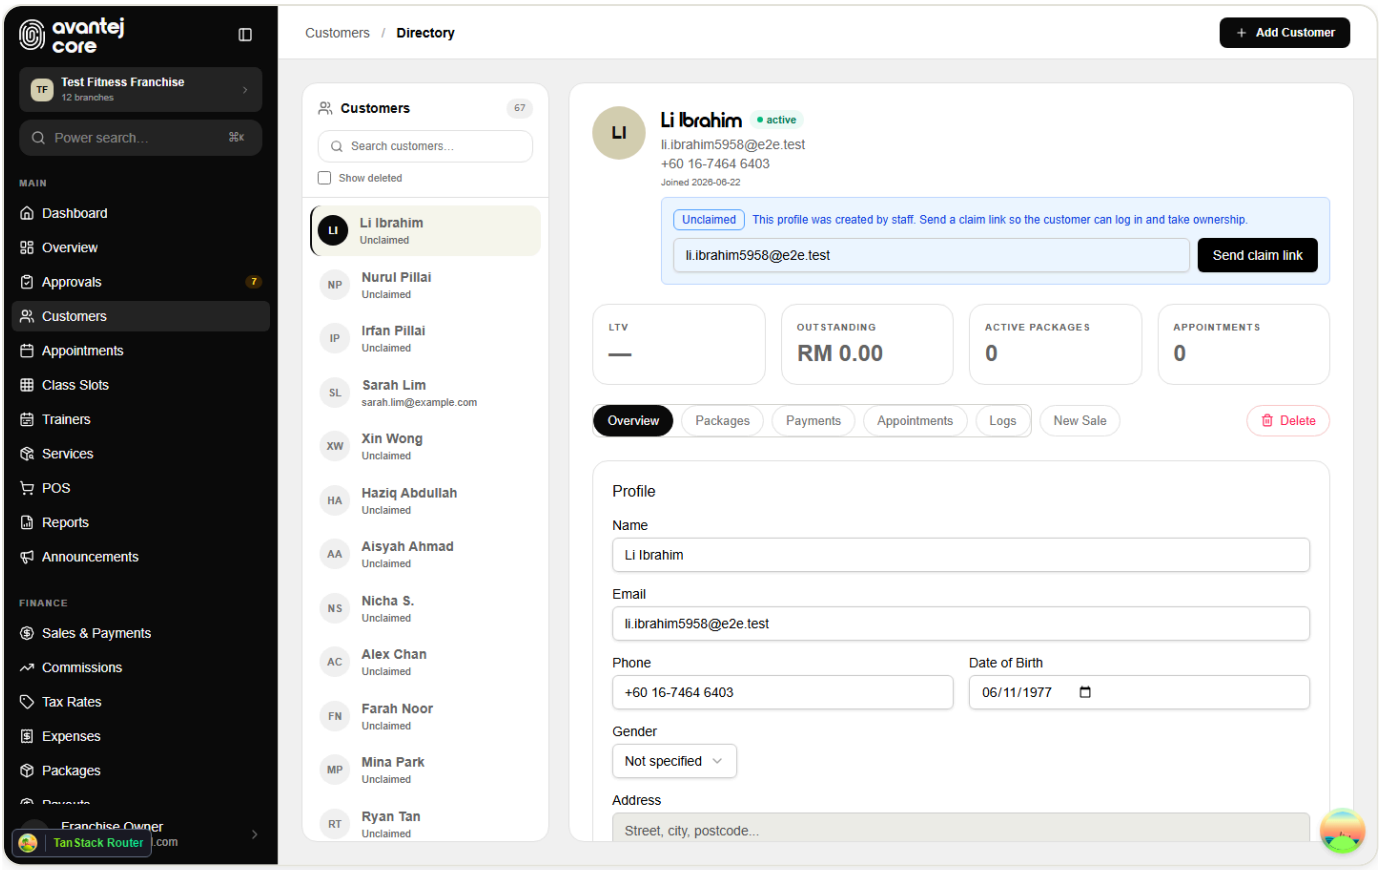

The dashboard overview — key numbers up top, the main menu on the left.

---

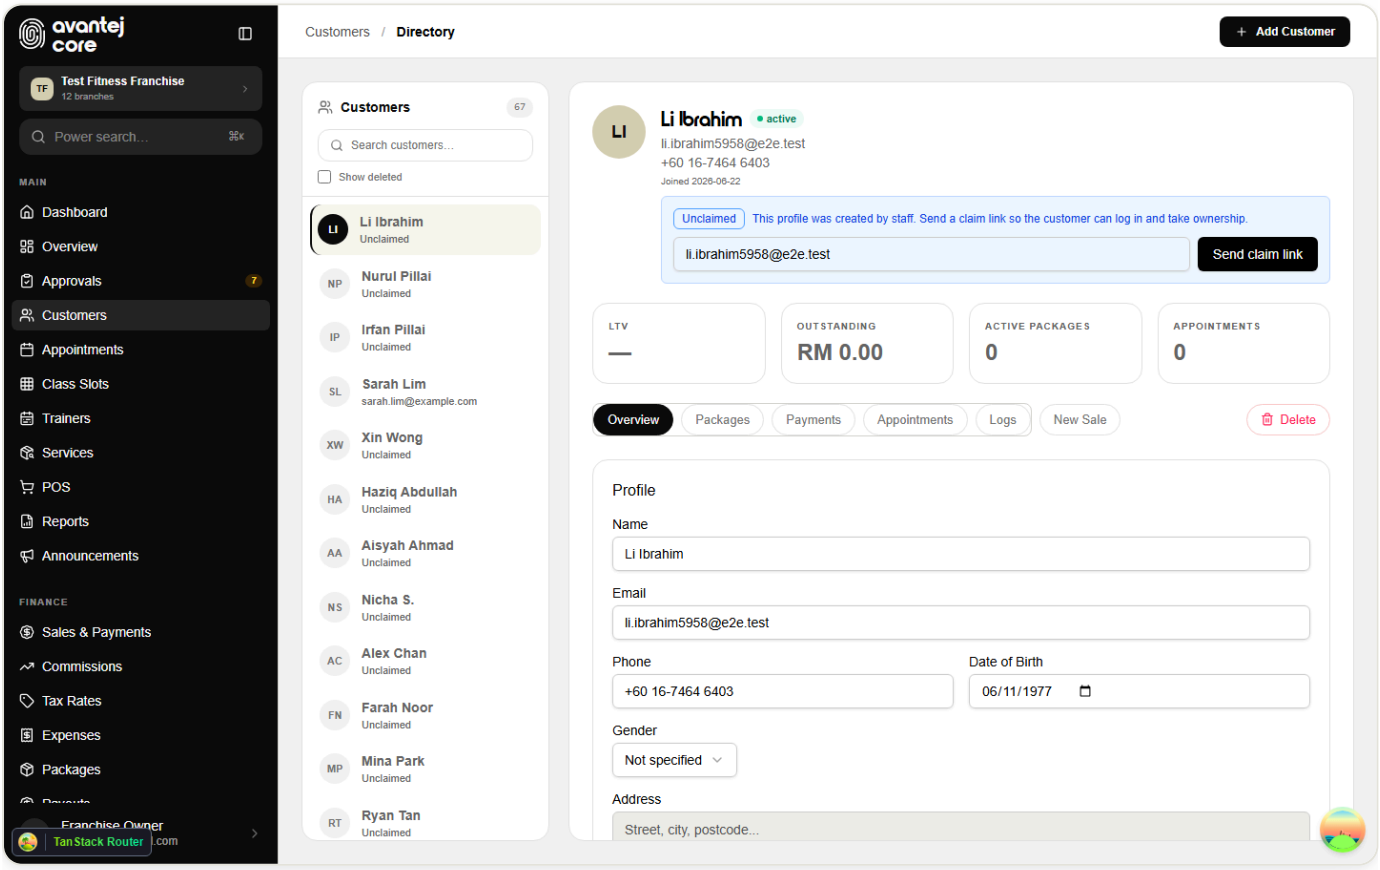

2. Customers

Your directory of everyone who buys from or trains at the gym.

`Sidebar → Customers`

The customer directory — search, add, and open any customer.

Walk-in customers — for one-off buyers who aren't members.

You can:

- **Add a new customer** — record their name, phone, and email.
- **Add a walk-in customer** — for one-off buyers who aren't members.
- **Edit a customer's name or email** at any time.
- **Open a customer's profile** to see their purchases, packages, and appointments.
- **Invite a customer to claim their account** — send them a sign-up link or magic link by email so they can log in to the member app.
- **Group customers into a household** — link family members together and add or remove people.
- **Remove a customer** (soft delete) and restore them later if needed.
- **Record where a customer came from** using lead sources.

How to add a customer

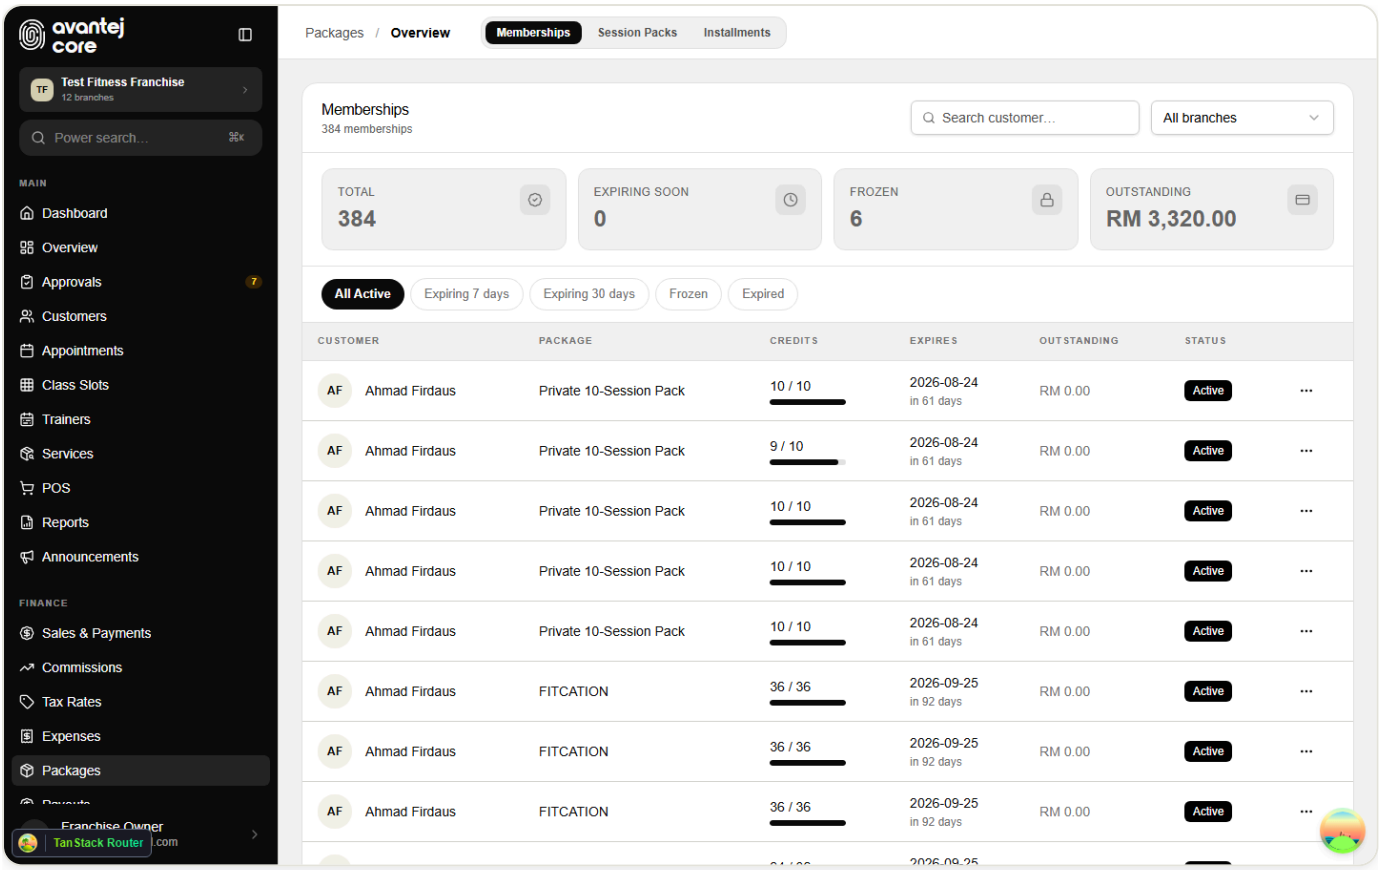

1. Go to *Customers* in the sidebar.
2. Select *Add customer*.
3. Enter their name, phone, and email, then save.
4. Optionally select *Send claim link* so they can access the member app.

---

3. Members & Memberships

Staff accounts and ongoing membership plans.

`Sidebar → Access Control · Memberships`

Membership plans and who is enrolled.

Staff members

- **Add a staff member** and assign their role.
- **Suspend, reactivate, or deactivate** a staff member.
- **Change a member's role or branch scope** — what they're allowed to see and do.
- **Remove and restore** a member account.

Memberships

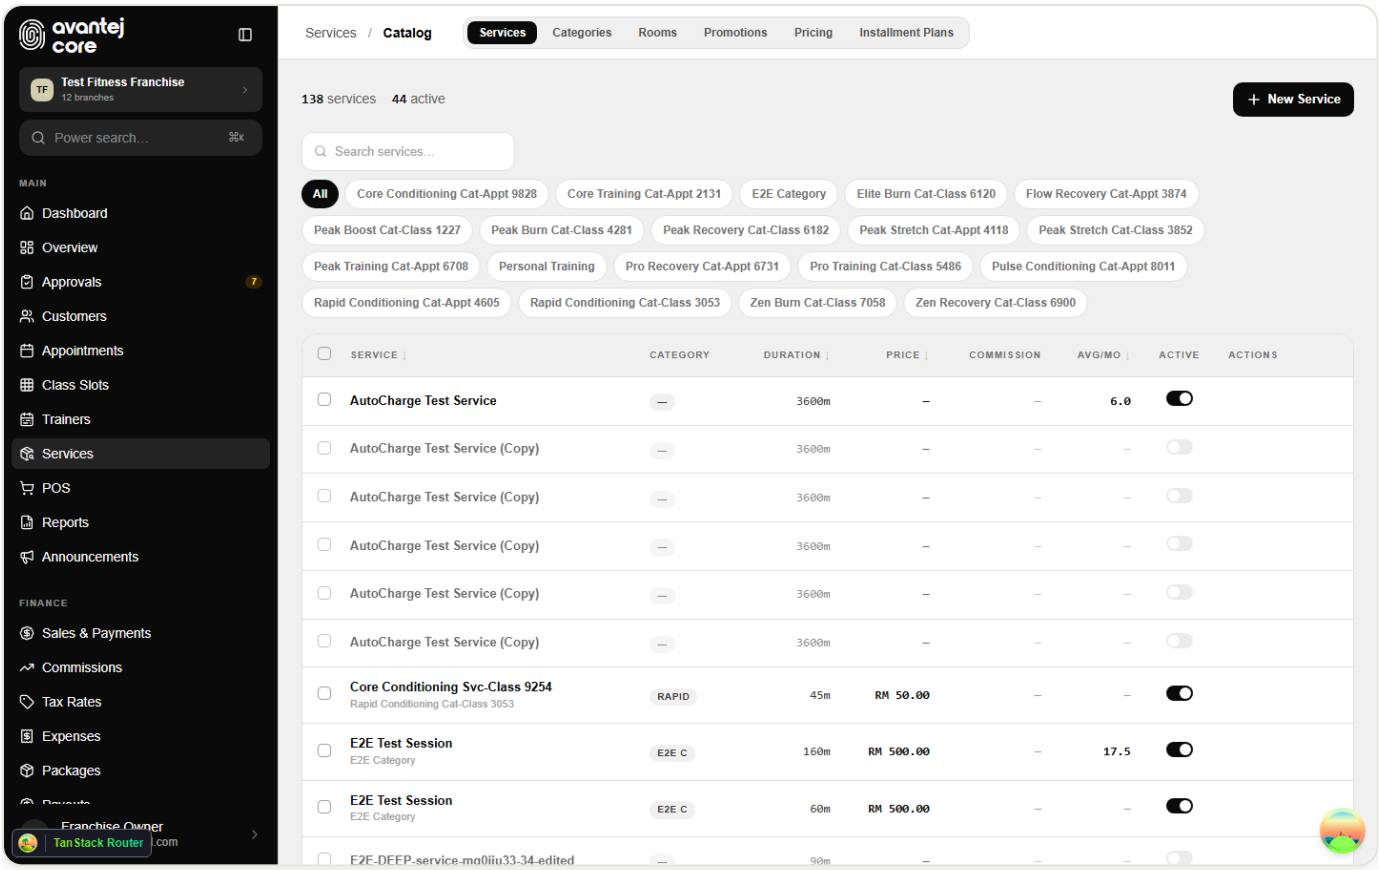

- **View membership plans** and who is enrolled.
- **Freeze a membership** when a customer pauses their plan.

---

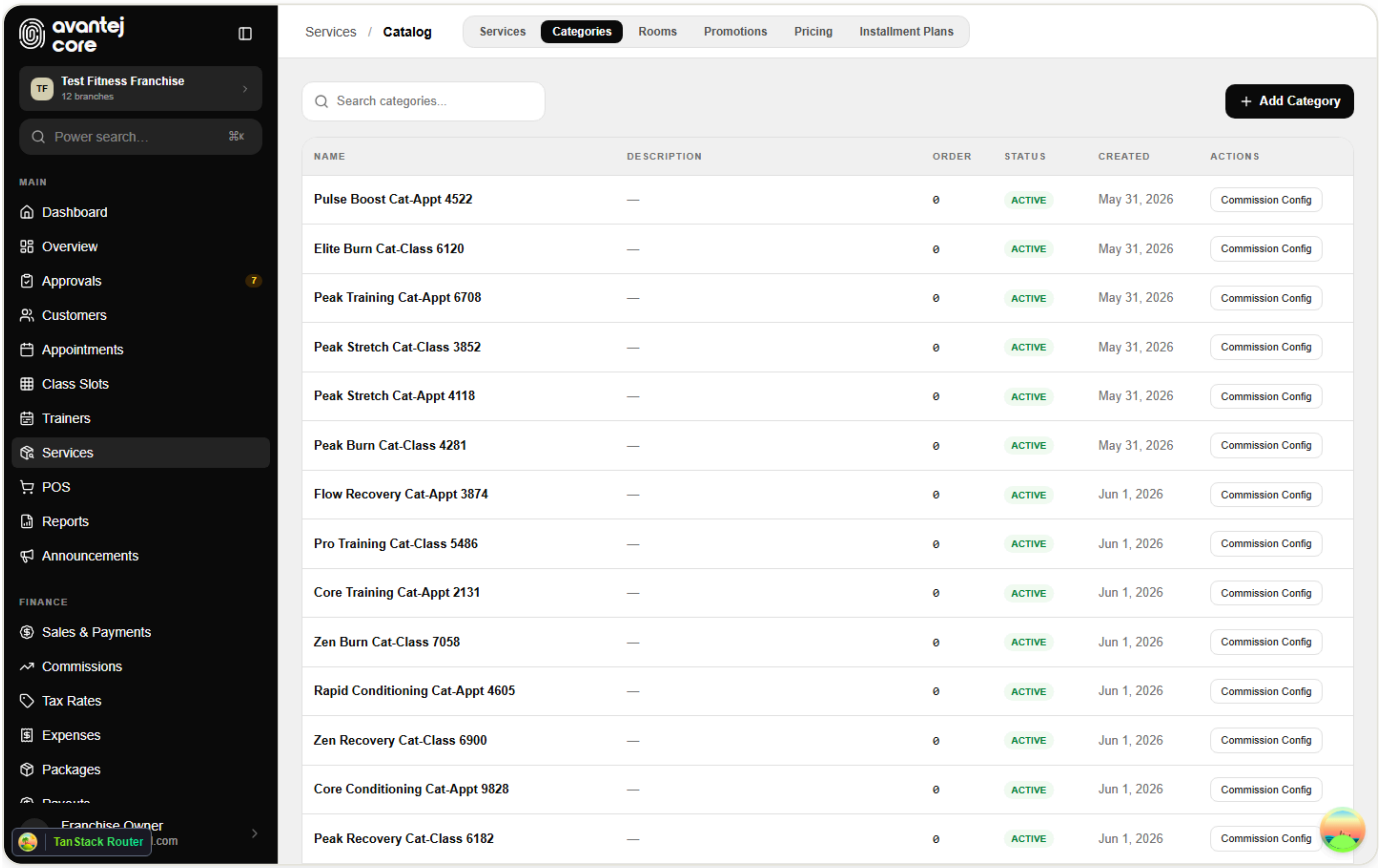

4. Services

The treatments, sessions, and classes you sell.

`Sidebar → Services · Service Categories`

Your service catalogue — create, edit, and price each service.

Organise services into categories.

- **Create a new service** — e.g. "Body Massage 60min" with its price and duration.

- **Edit or duplicate a service** to quickly build similar ones.
- **Set a different price per branch** — and expire or remove a branch price later.
- **Organise services into categories** and create new categories.
- **Assign which trainers can deliver a service** and set buffer times between sessions.

How to create a service

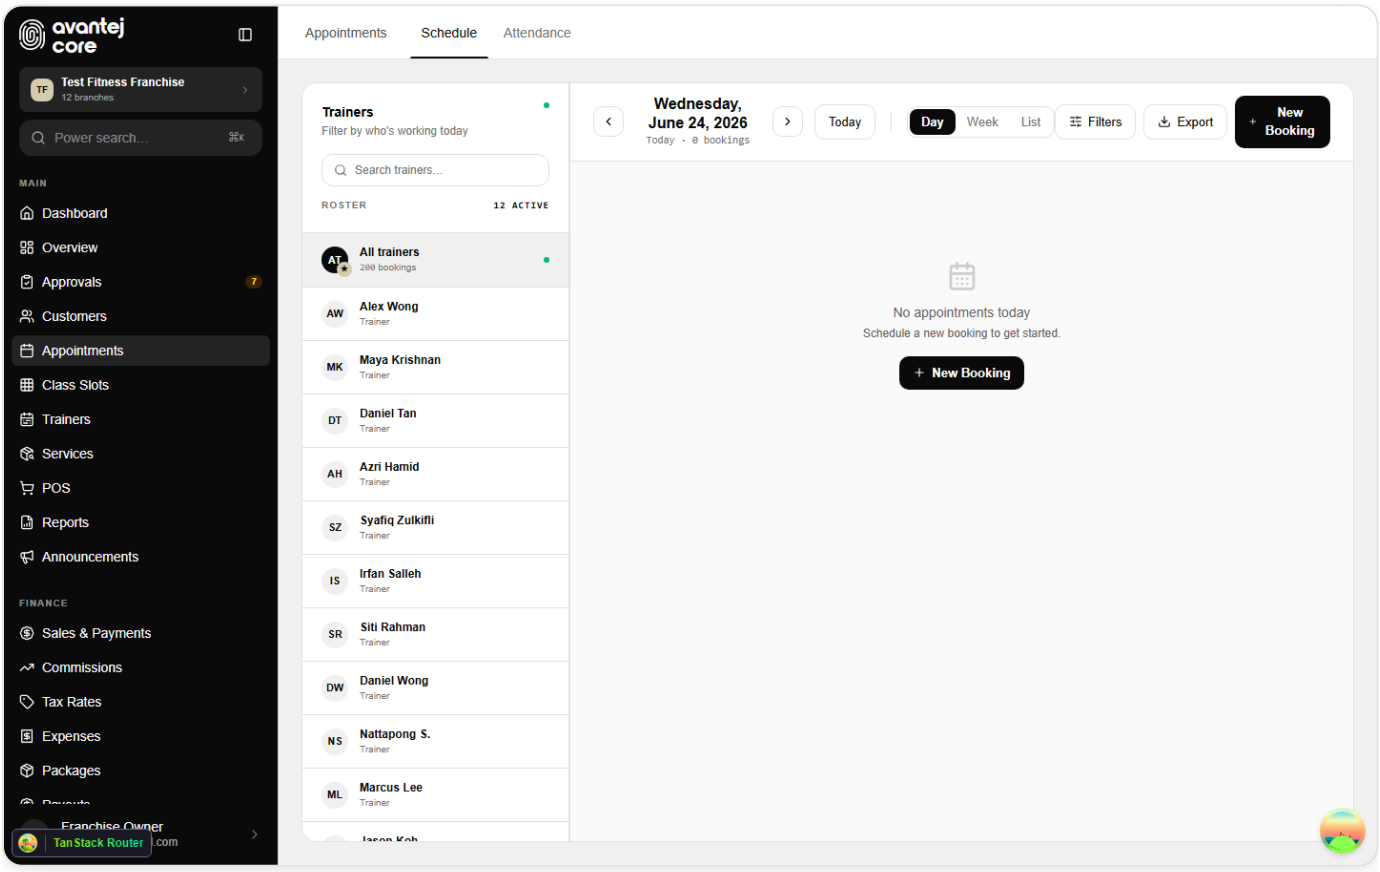

1. Go to *Services* and select *Create service*.
2. Enter the name, duration, and standard price.
3. Choose a category.
4. Save, then assign trainers from the trainer's profile if needed.

---

5. Appointments

Booking and managing one-on-one sessions.

`Sidebar → Appointments`

The appointments view — book, reschedule, and manage sessions.

- **Book an appointment** for a customer with a chosen service, trainer, and time.

- **Reschedule or update** an existing appointment.
- **Cancel a single appointment**, all future ones, or a whole recurring series.
- **Split a recurring series** when only part of it needs to change.
- **Reinstate session credits** when an appointment is cancelled.
- **Bulk-create appointments from a schedule** for recurring bookings.

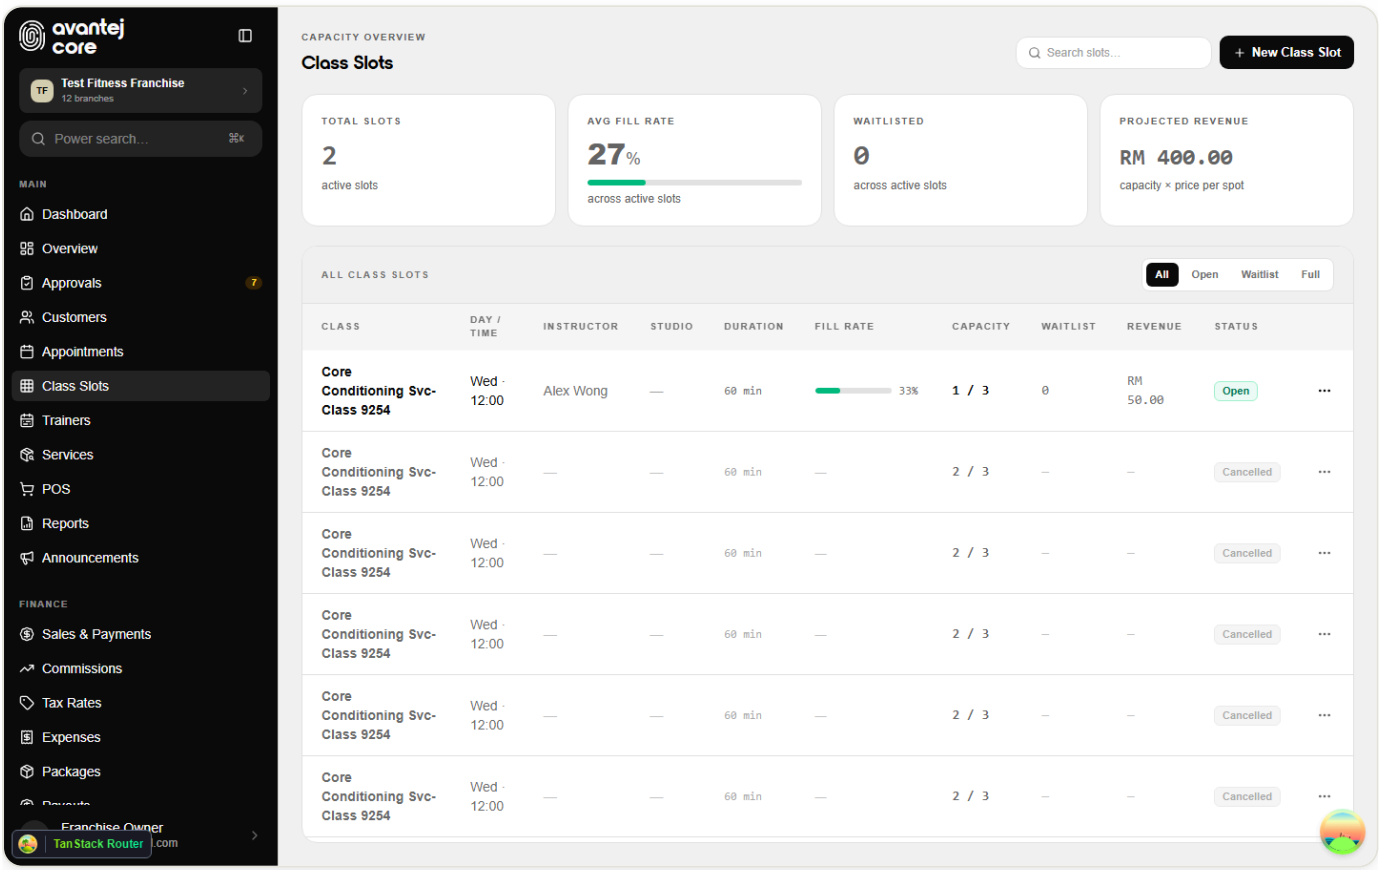

> **Tip:** Leave the trainer blank to let the rotation queue assign one automatically.

---

6. Classes & Coaching

Group class slots and coach intake scheduling.

`Sidebar → Appointments → Class Slots`

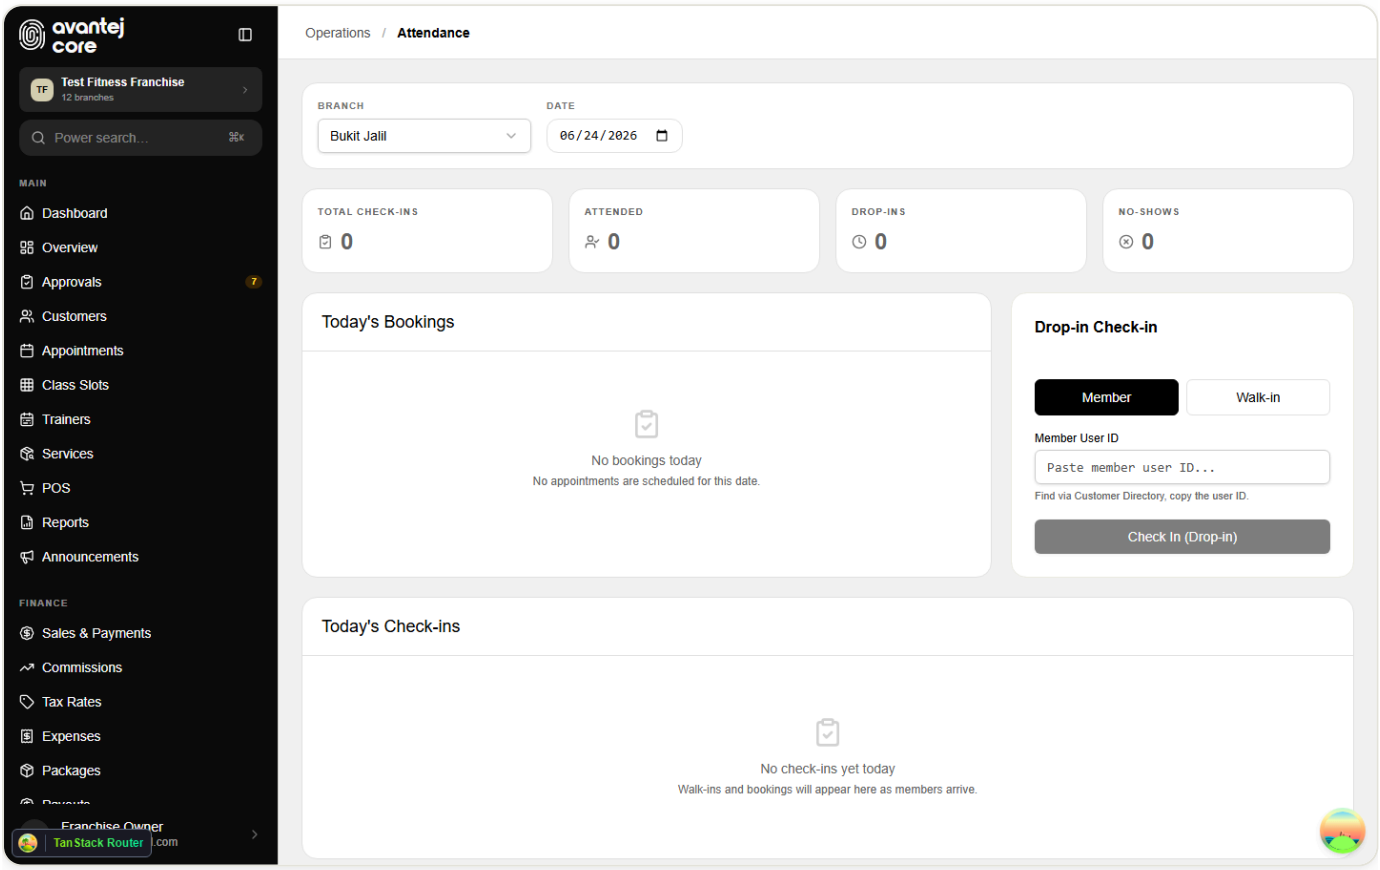

Group class slots — set times, capacity, and enroll clients.

- **Create a class slot** with a time, capacity, and trainer.
- **Update or cancel** a class slot.
- **Enrol a client** into a class, or cancel their enrollment.
- **Set up coach intake slots** and let coaches claim or release them.

7. Attendance & Check-ins

Recording who showed up.

`Sidebar → Attendance`

Check customers in and review attendance history.

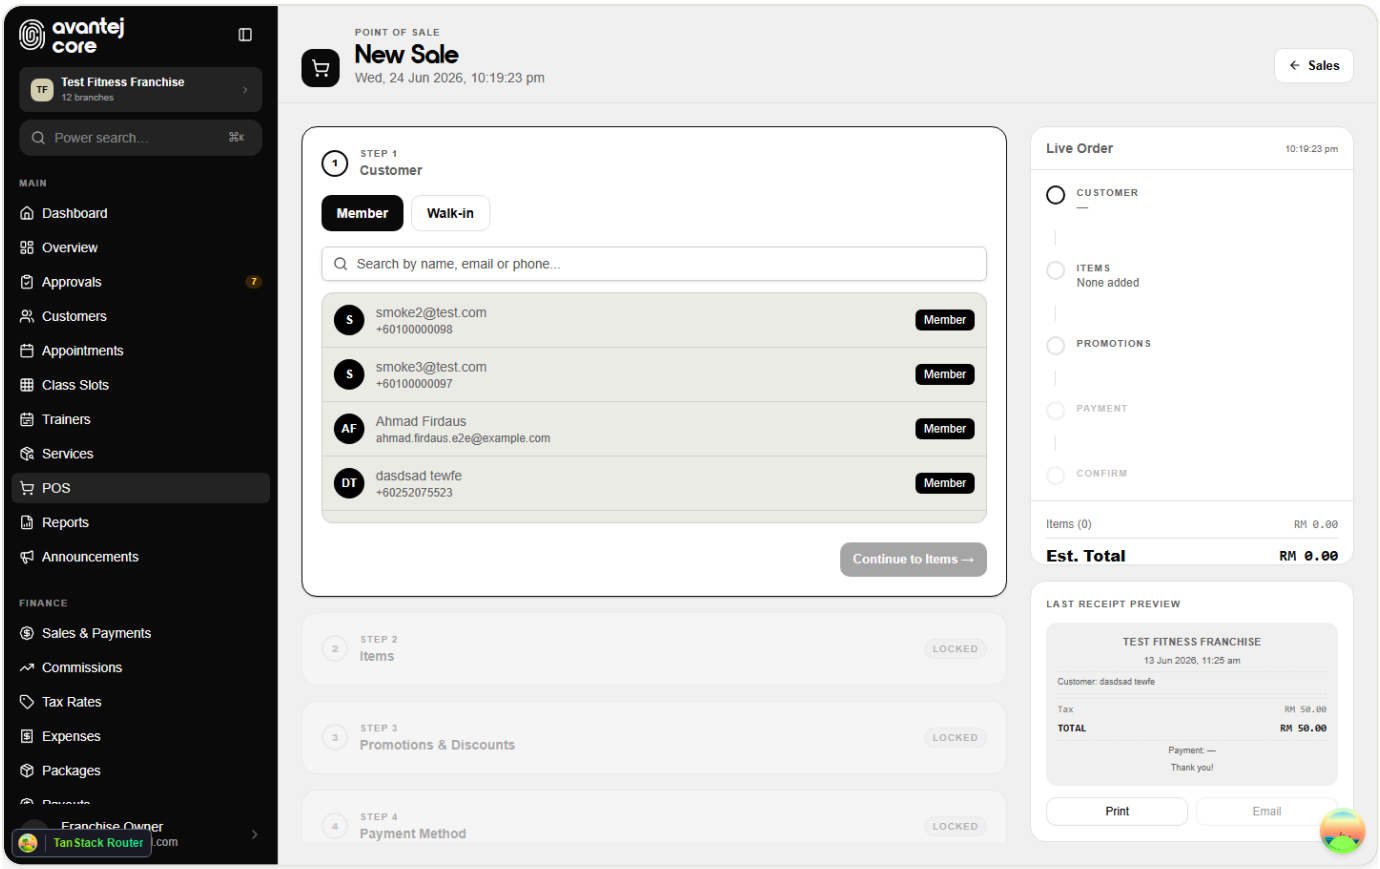

- **Check a customer in** when they arrive — one at a time or in bulk.
- **View today's bookings** and check-in history.
- **See a member's active package** at the moment of check-in.
- **Remove a check-in** recorded by mistake.

---

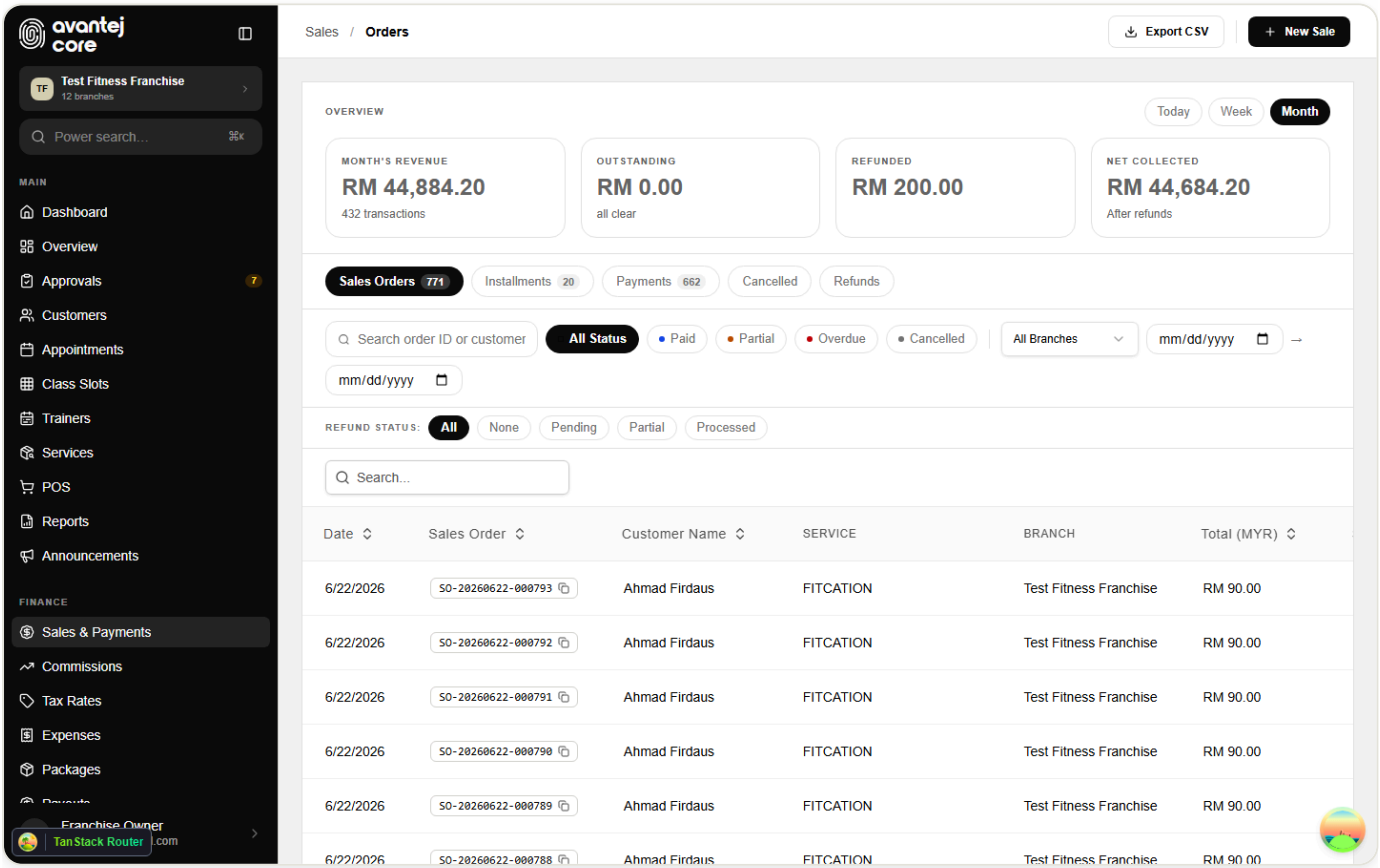

8. Point of Sale (POS)

Ringing up sales at the front desk.

`Sidebar → POS (Sales → Create)`

The POS checkout — pick a customer, add items, apply promotions, take payment.

The sales list — with tabs for installments, payments, cancelled, and refunds.

- **Record a sale** — add services, products, or packages and take payment.

- **Search for a customer** during checkout, or sell to a walk-in.
- **Apply a promotion or tax** at checkout.
- **View the sales list** with separate tabs for installments, payments, cancelled sales, and refunds.
- **Open a sale's receipt** to see the full detail.
- **Cancel a sale** when needed.

How to ring up a sale

1. Go to *Sales → Create*.
2. Search for and select the customer (or choose walk-in).
3. Add the services, products, or package to the cart.
4. Apply any promotion, then confirm the payment method.
5. Record the sale — the receipt is generated automatically.

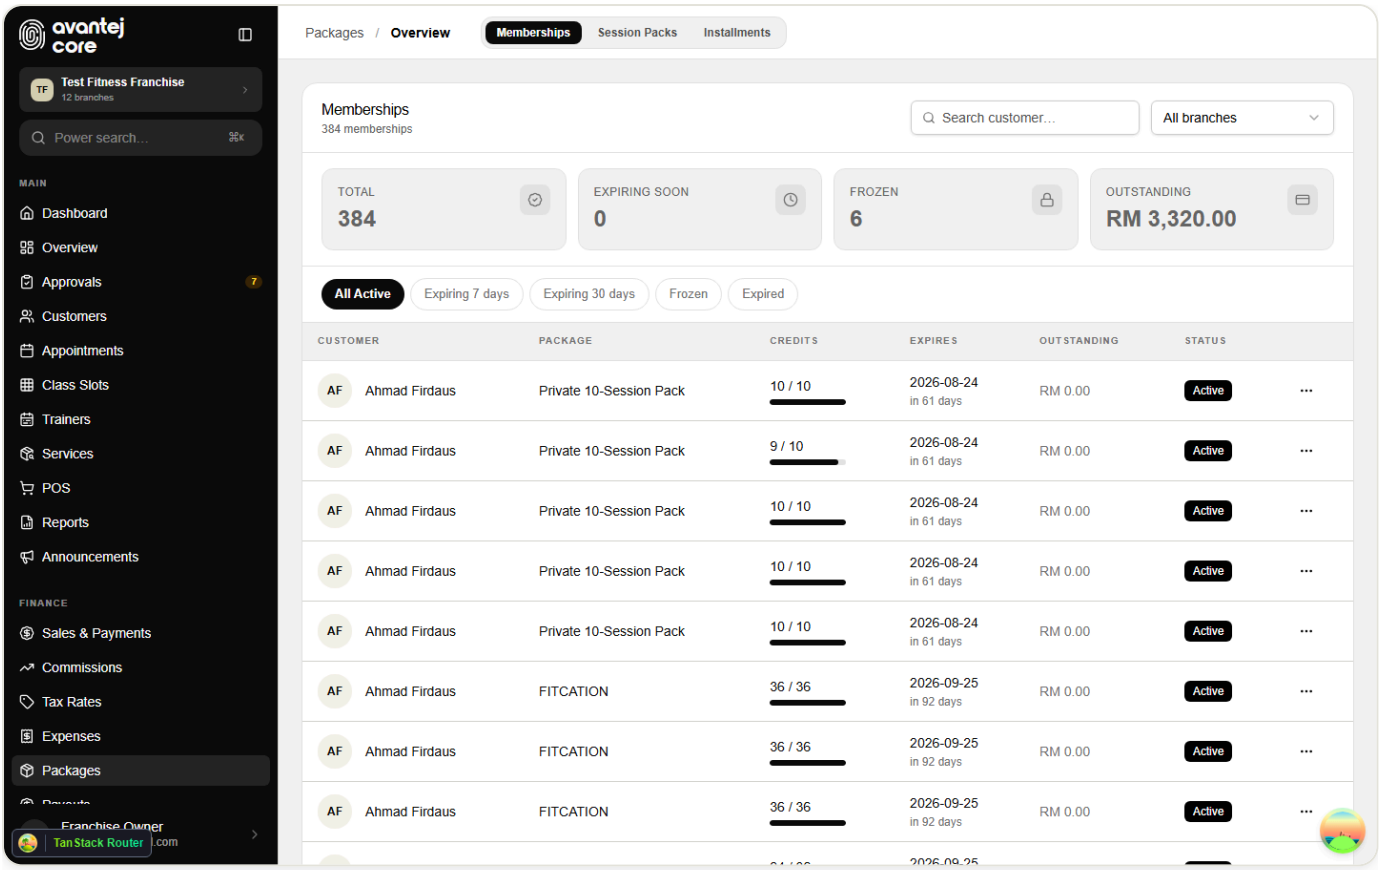

> **Important:** When selling a package on an installment plan, the POS shows the *installment amount due now*, not the full package price.

---

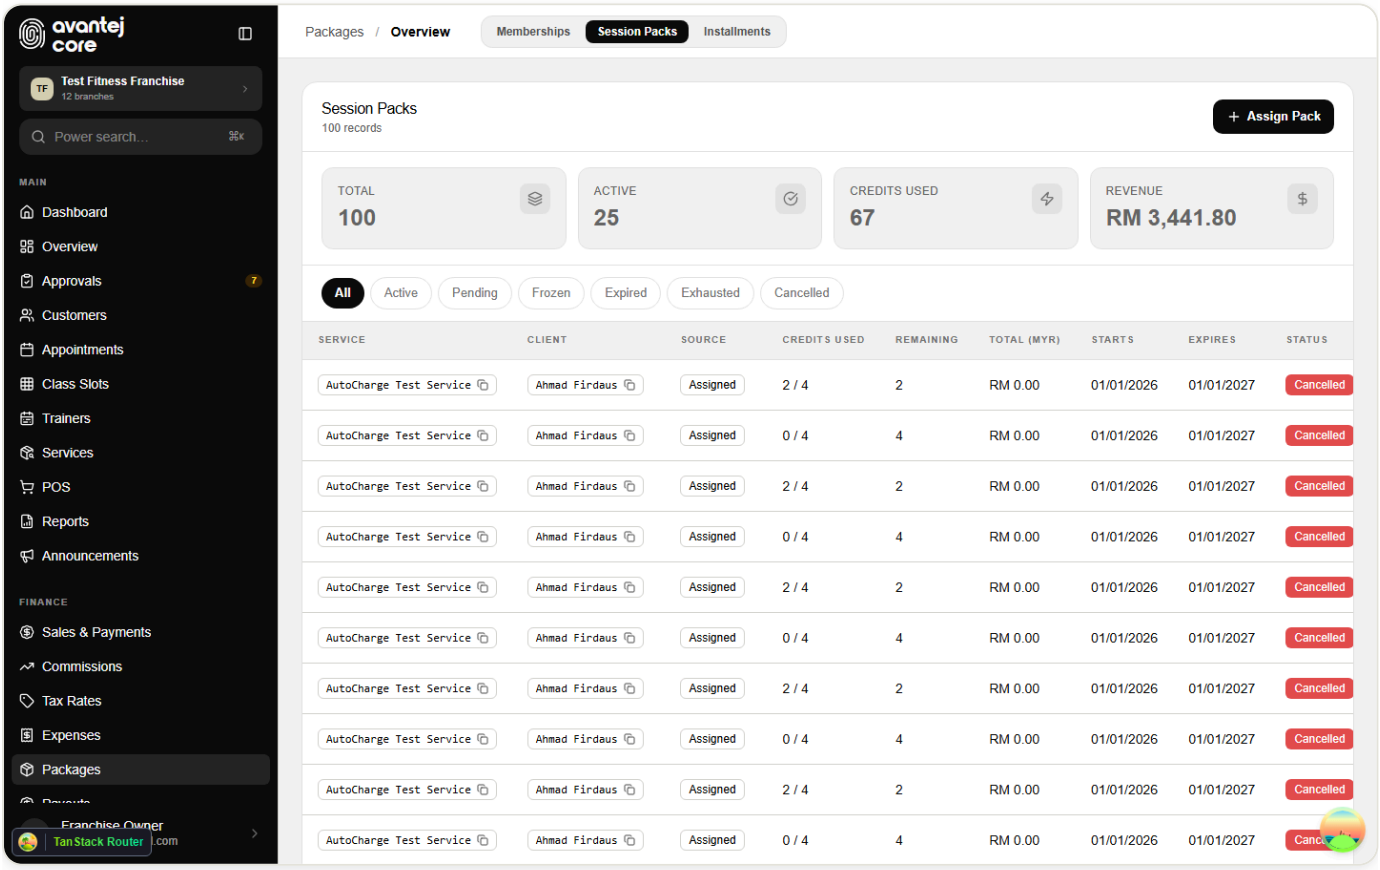

9. Packages

Pre-paid bundles of sessions or services.

`Sidebar → Packages · Package Instances`

Pre-paid package offerings sold to customers.

Active package instances — the packages customers have bought.

- **Sell a package** to a customer (creates a package instance).

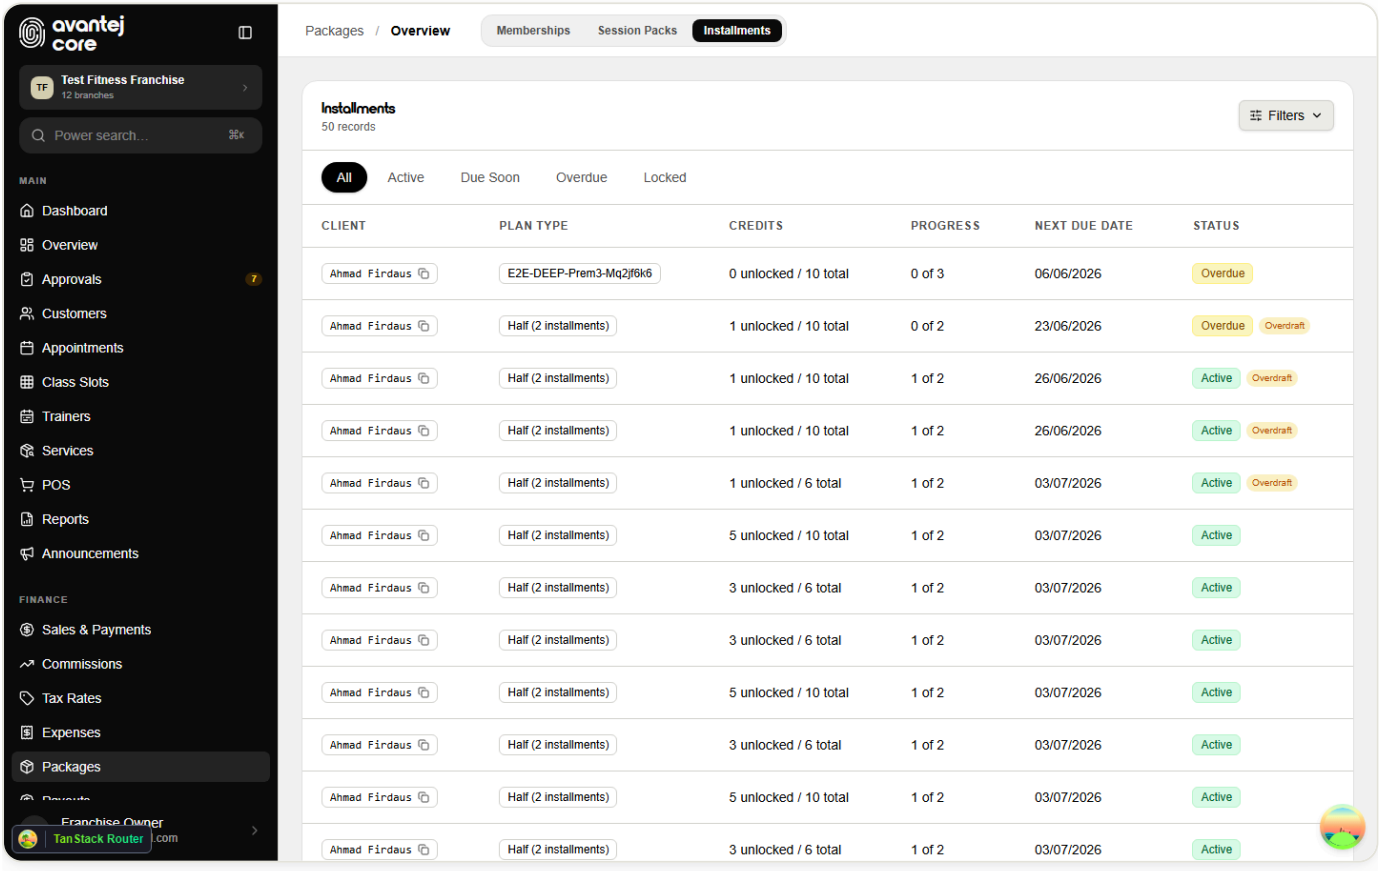

- **Freeze, unfreeze, or extend** a package.
- **Cancel or reject** a package.
- **Assign a trainer** to a package and manage package staff.
- **Confirm payment** and review pending packages.
- **Bulk-assign packages** to multiple customers at once.
- **Sign the package agreement** and upload or download payment proof.

---

10. Installment Plans

Letting customers pay over time.

`Sidebar → Packages → Installments · Settings → Installment Plans`

Track installment schedules and confirm payments as they come due.

Managing a customer's installments

- **View the installment schedule** for a package and upcoming dues.
- **Confirm a payment** or reschedule an installment.
- **Waive an installment** or adjust credits.
- **Suggest and process a refund** on installments.

- **Set an overdraft, manually unlock, or reset overrides** for special cases.
- **Export upcoming installments** to a CSV file.

Setting up plan templates

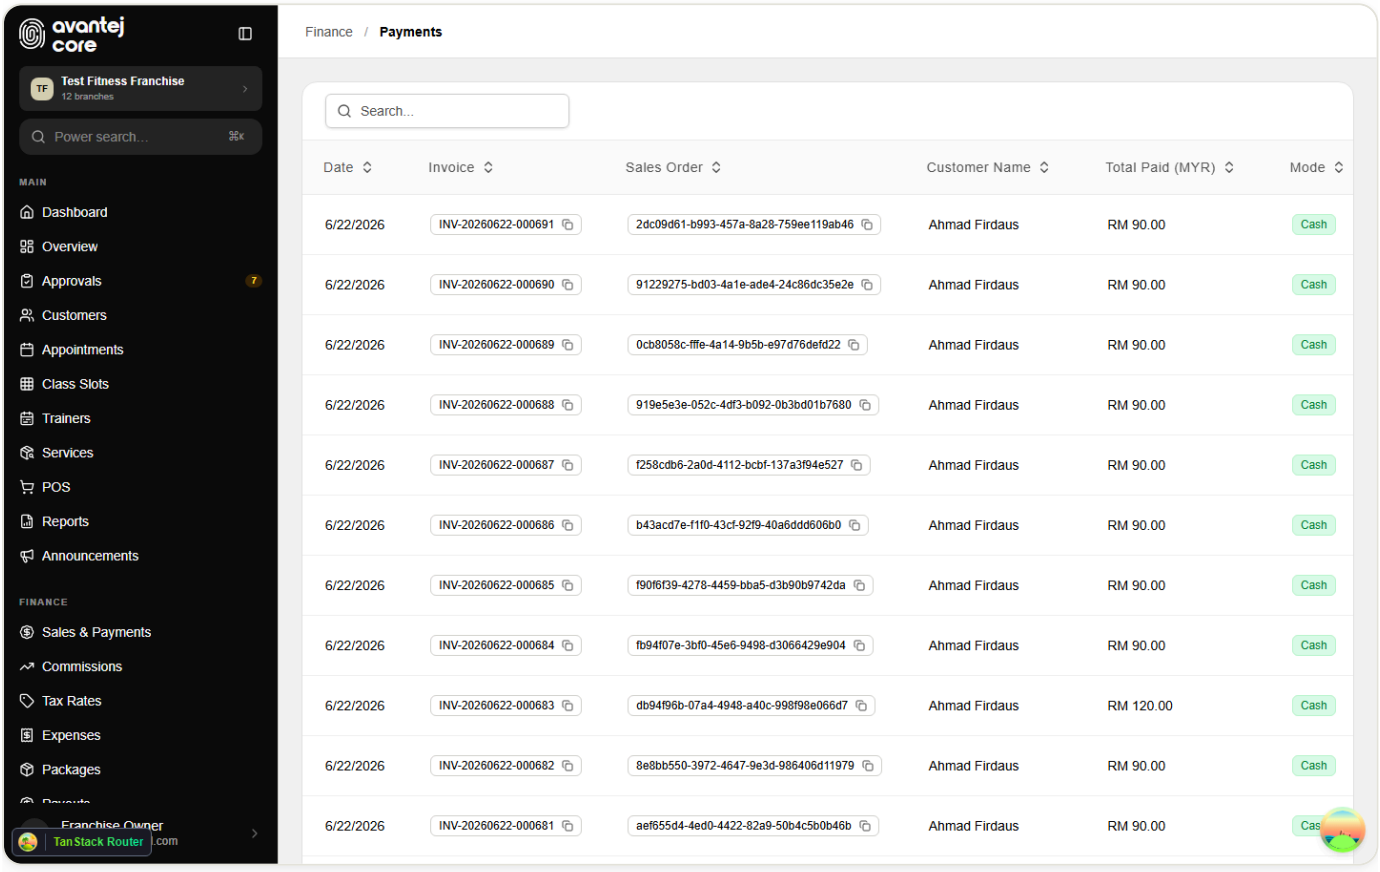

- **Create installment plan templates** (e.g. 3-month, 6-month).
- **Set a default plan**, and deactivate or reactivate plans.

---

11. Payments & Refunds

Collecting money and giving it back.

`Sidebar → Sales & Payments · Refunds`

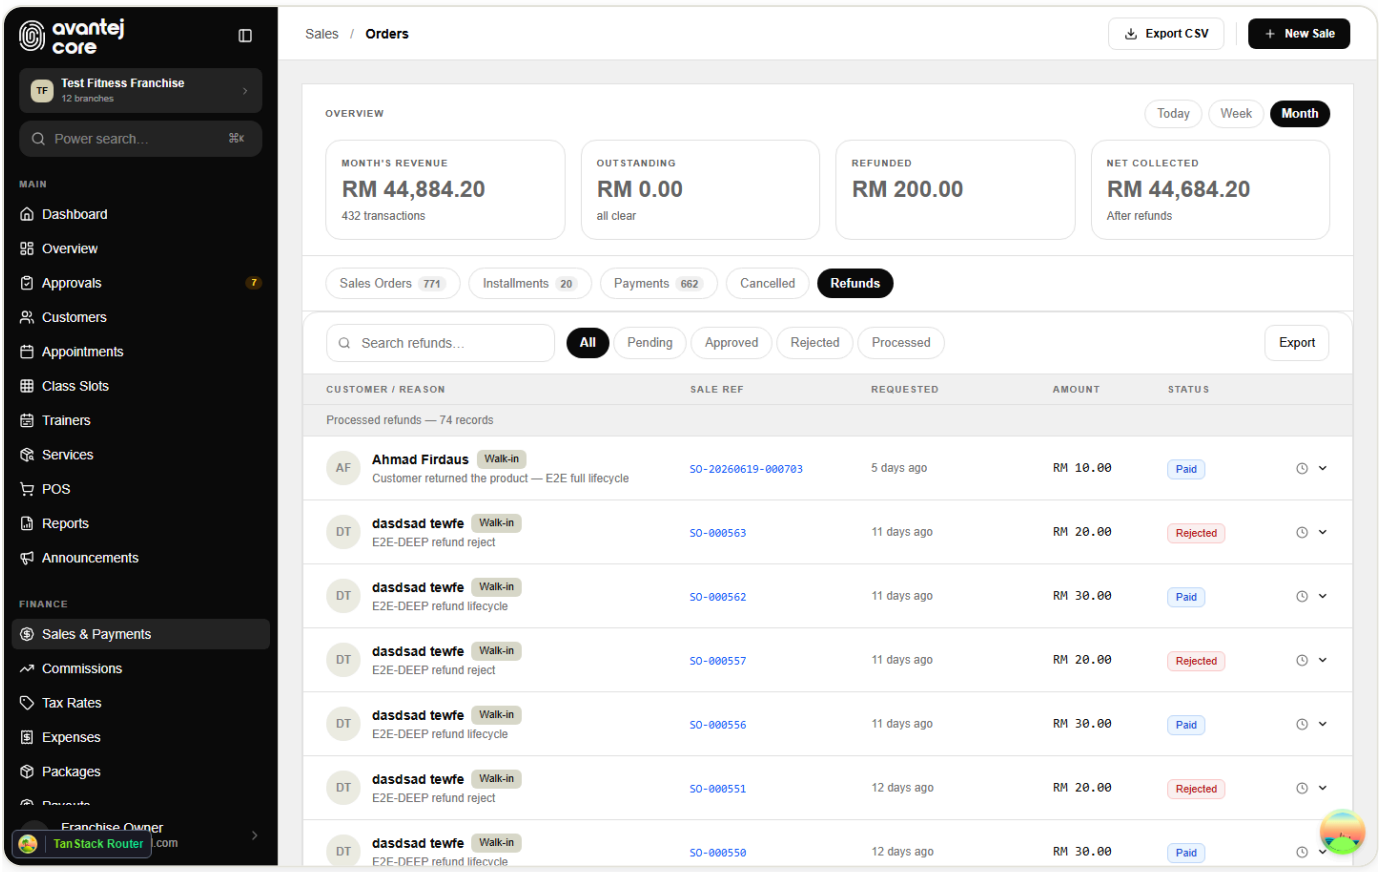

Payment history and reconciliation.

Payments

- **Send a payment link** for a sale or an installment.
- **Set up a card on file** for a customer.
- **View payment history** and reconcile records.

Refunds

Request, approve, and process refunds.

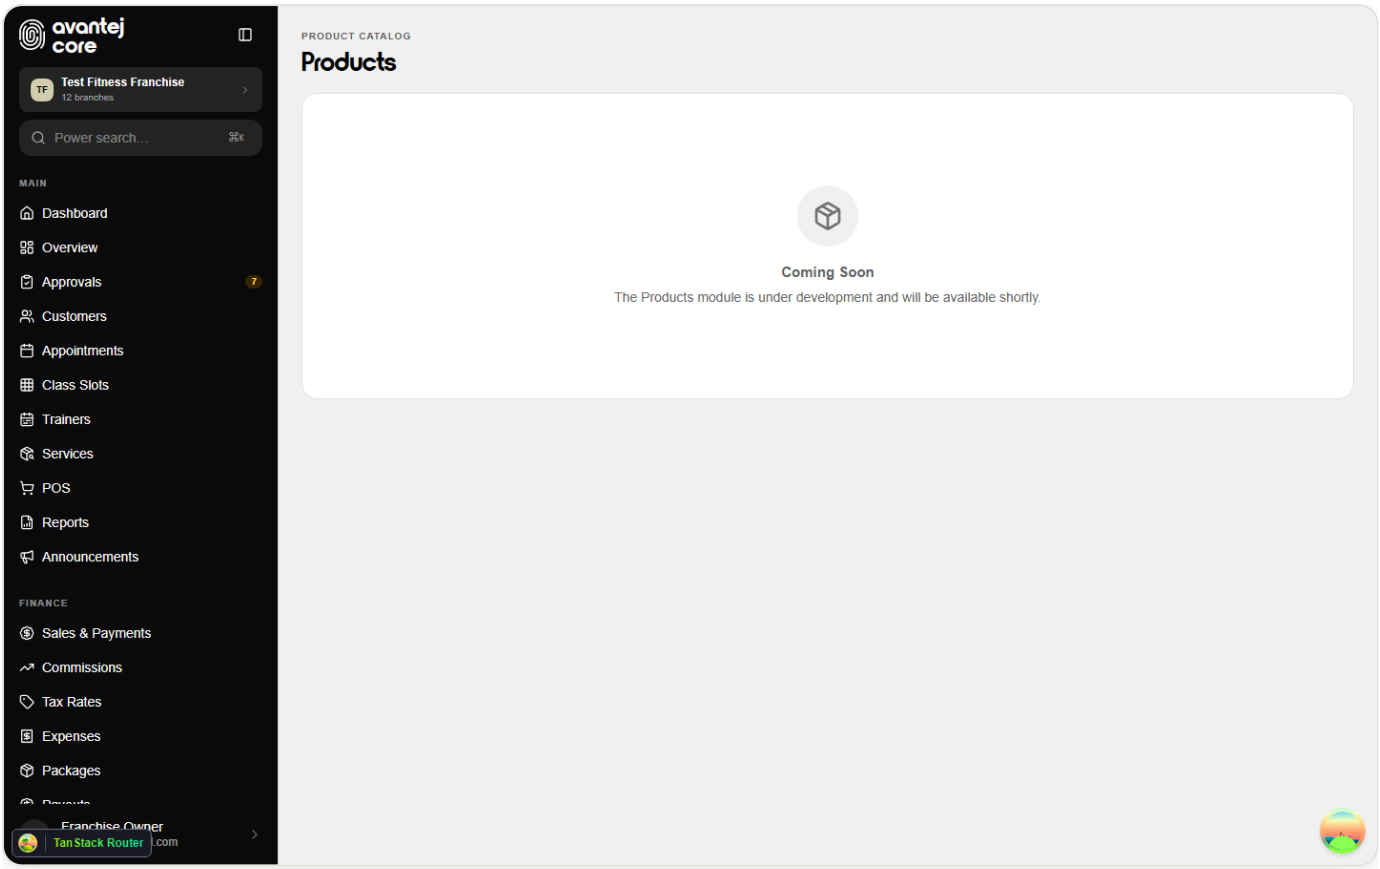

- **Request a refund** (full or partial).
- **Approve or reject** a refund request — single or in bulk.
- **Process an approved refund** back to the customer.

---

12. Products & Inventory

Retail items, brands, and units.

`Sidebar → Products · Brands · Categories · UOM`

Retail products available for sale.

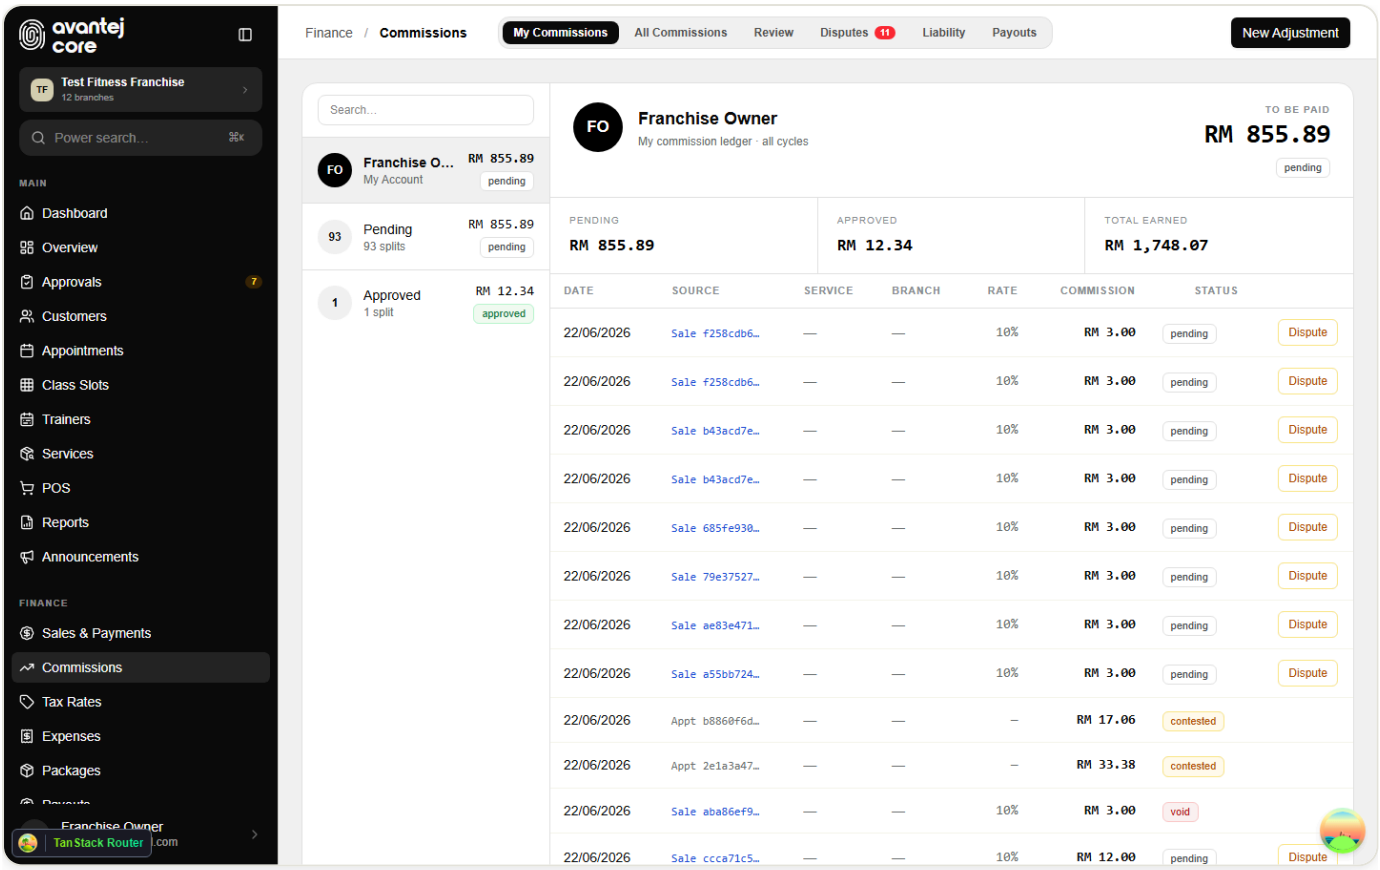

- **Add and edit products** for retail sale.
- **Set branch-specific prices** for products.
- **Manage product categories and brands** — create, edit, delete.
- **Define units of measure** and conversion rules (e.g. box → bottle).

---

13. Commissions

Tracking what trainers and staff earn on sales.

`Sidebar → Commissions · My Commissions`

Commission splits earned across the gym — approve, void, or mark paid.

- **View commission splits** earned across the gym, or just your own.
- **Approve, void, or mark a commission paid** — one at a time or in batches.
- **Contest a commission** and resolve disputes or reviews.
- **Make a manual commission adjustment** for special cases.
- **Set commission cycles and category rates**.
- **Export the commission liability** to a CSV file.

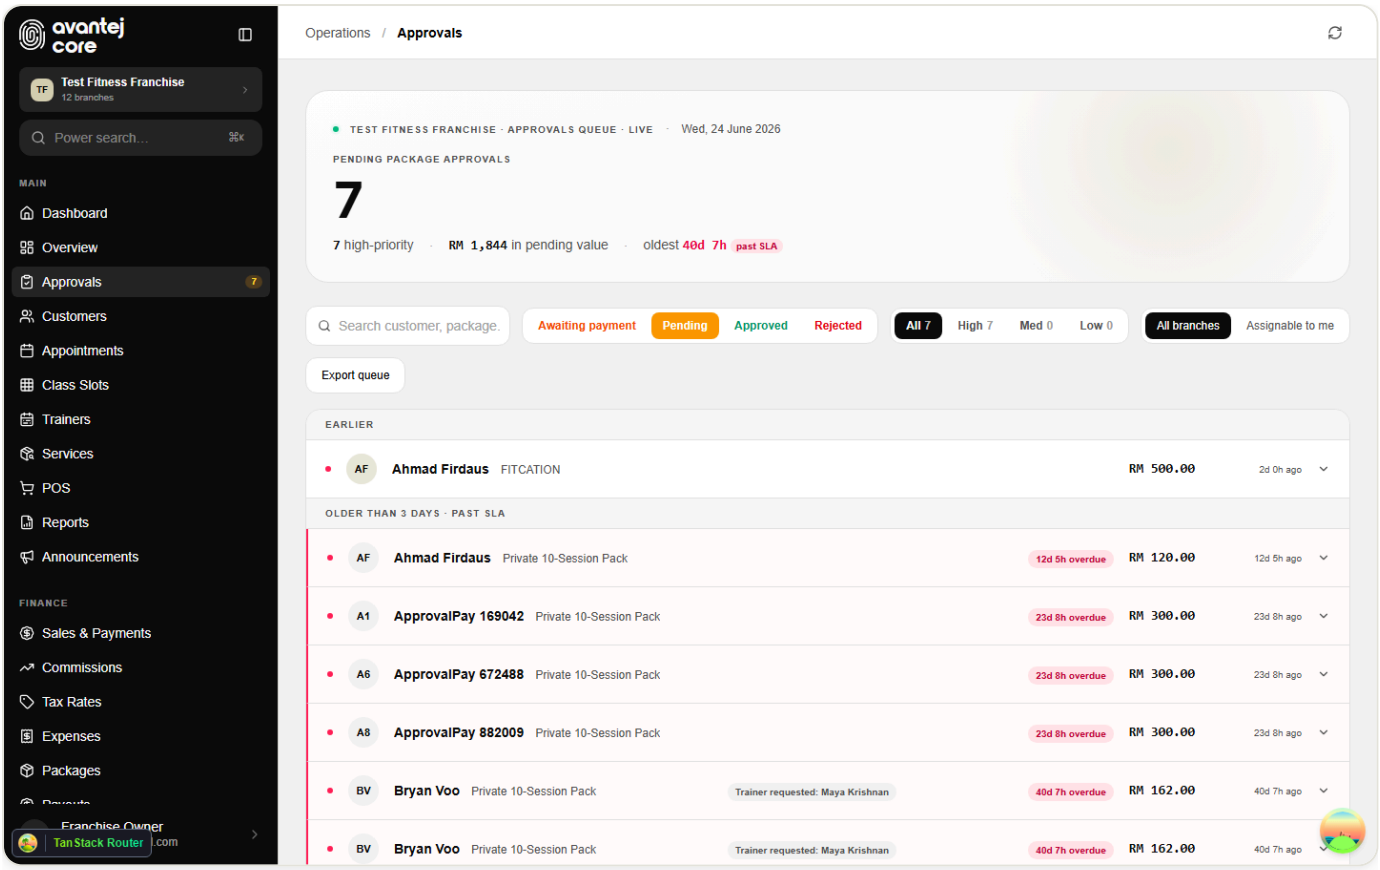

> **Note:** Commission always reaches the trainer — whether they were specifically requested or assigned by the rotation queue.

---

14. Payouts

Paying out what staff have earned.

`Sidebar → Approvals (Operations)`

The approvals queue where payout batches and other approvals are handled.

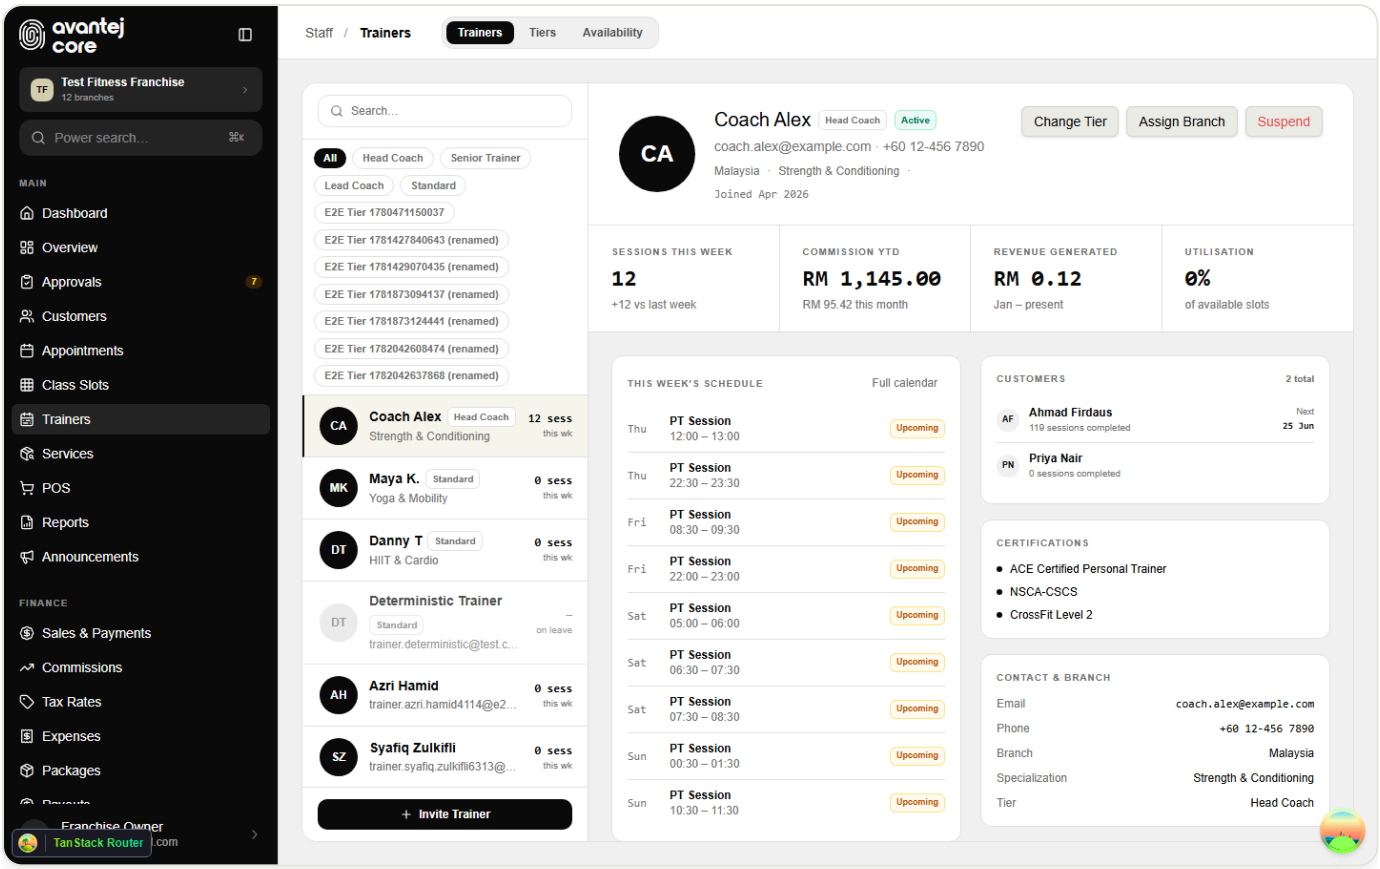

- **Run a payout batch** for a period.
- **Process a payout for one recipient**.
- **Mark a payout paid or failed**, retry, or cancel it.

---

15. Trainers

Managing your coaching team.

`Sidebar → Trainers`

Your coaching team — schedules, stats, availability, and tiers.

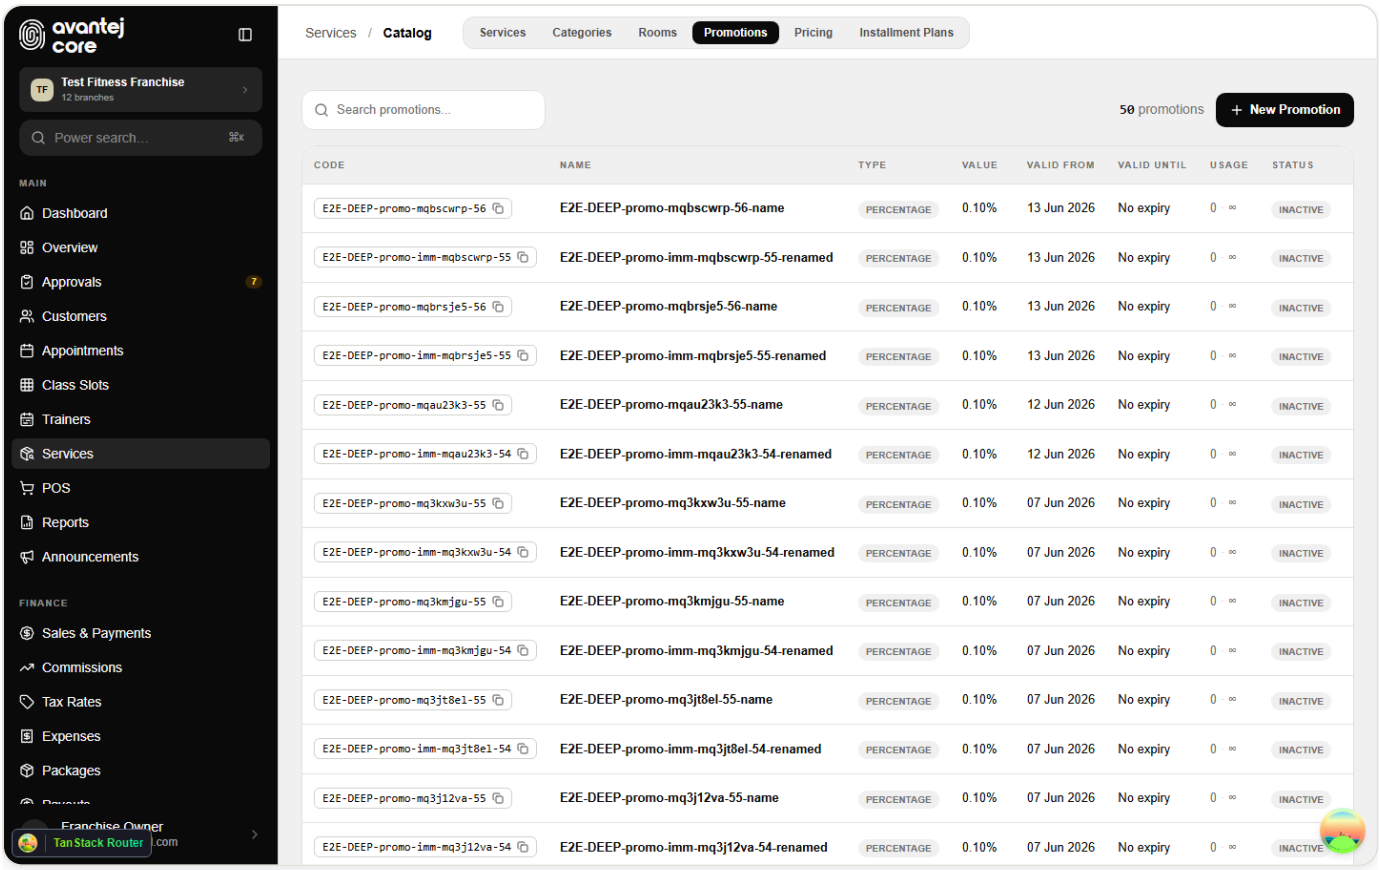

- **View trainers**, their weekly schedule, and weekly stats.
- **Set trainer availability** and add exceptions (days off).
- **Check trainer utilisation** — how booked they are.
- **Manage trainer tiers** — create tiers and assign them to staff.

---

16. Promotions

Discounts and promo codes.

`Sidebar → Promotions`

Discounts and promo codes you can apply at checkout.

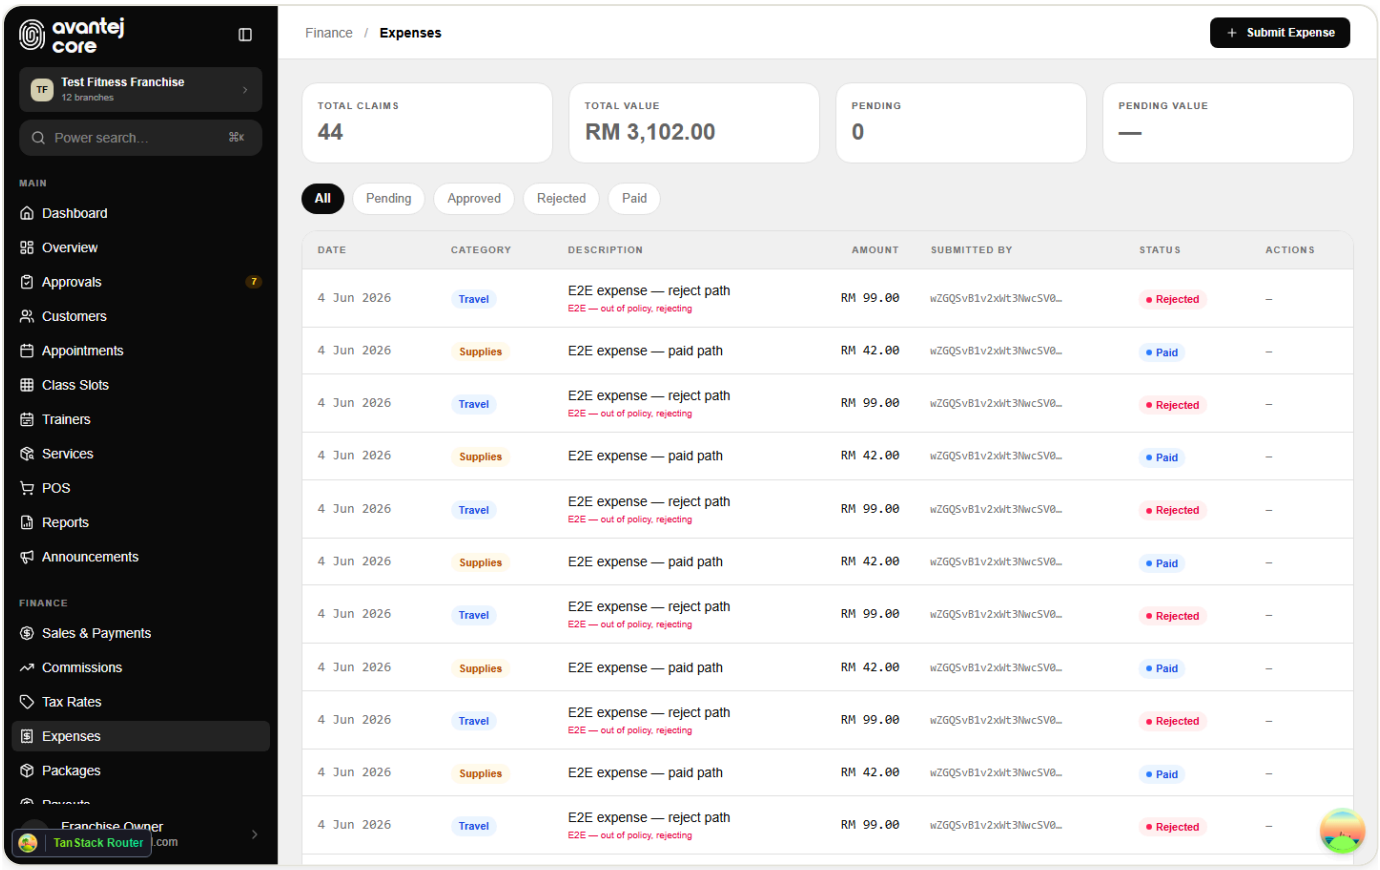

- **Create a promotion** with a value and validity dates.
- **Edit or deactivate** a promotion.
- **Validate a promo code** at checkout.

---

17. Expenses

Recording money the gym spends.

`Sidebar → Expenses`

Record, approve, and pay out gym expenses.

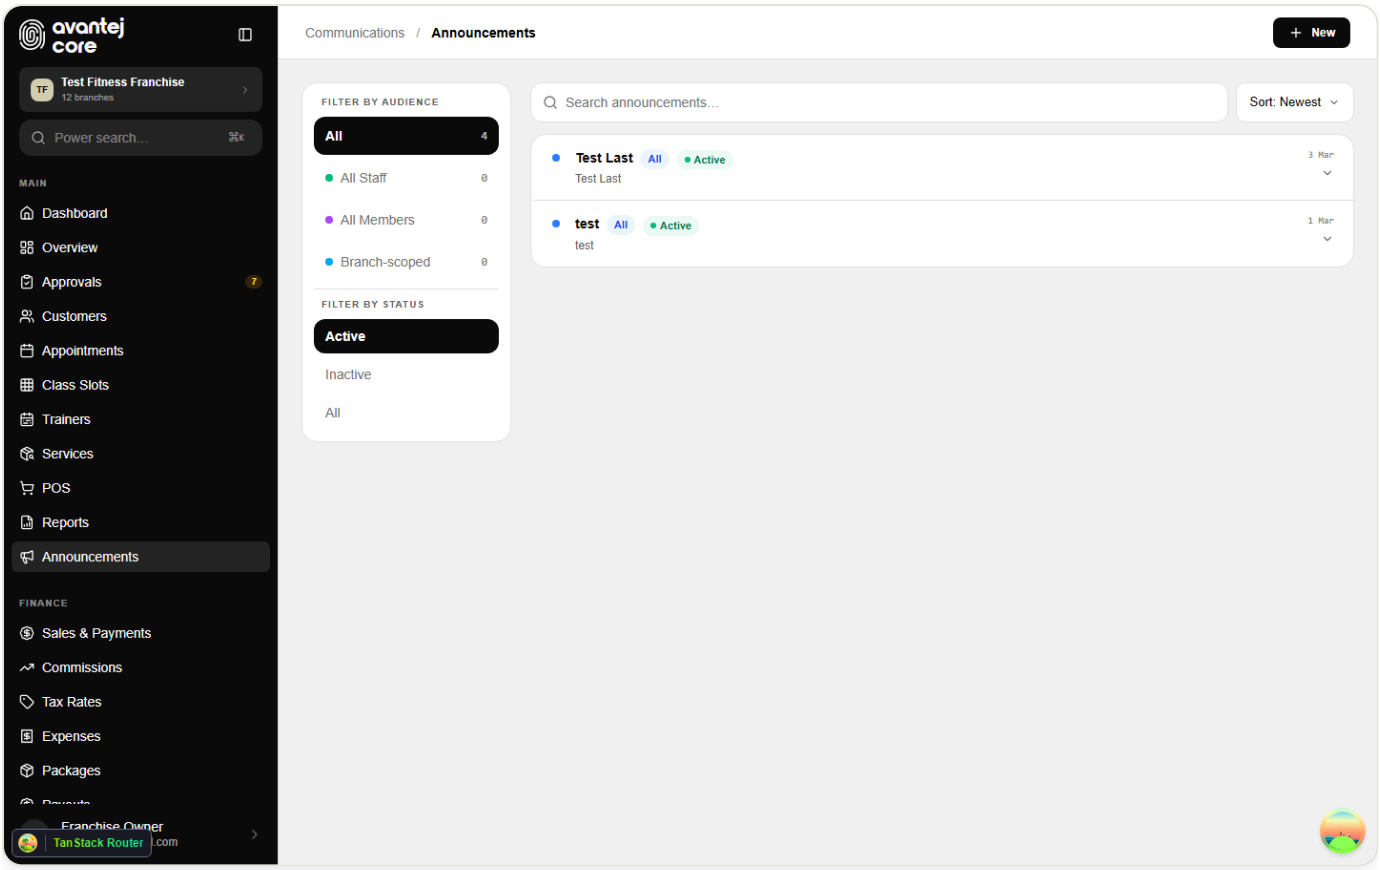

- **Record an expense** and categorise it.
- **Approve or reject** a submitted expense.
- **Mark an expense as paid**.

---

18. Announcements & Notifications

Keeping staff and members informed.

`Sidebar → Announcements · Notifications`

Post announcements to keep staff and members informed.

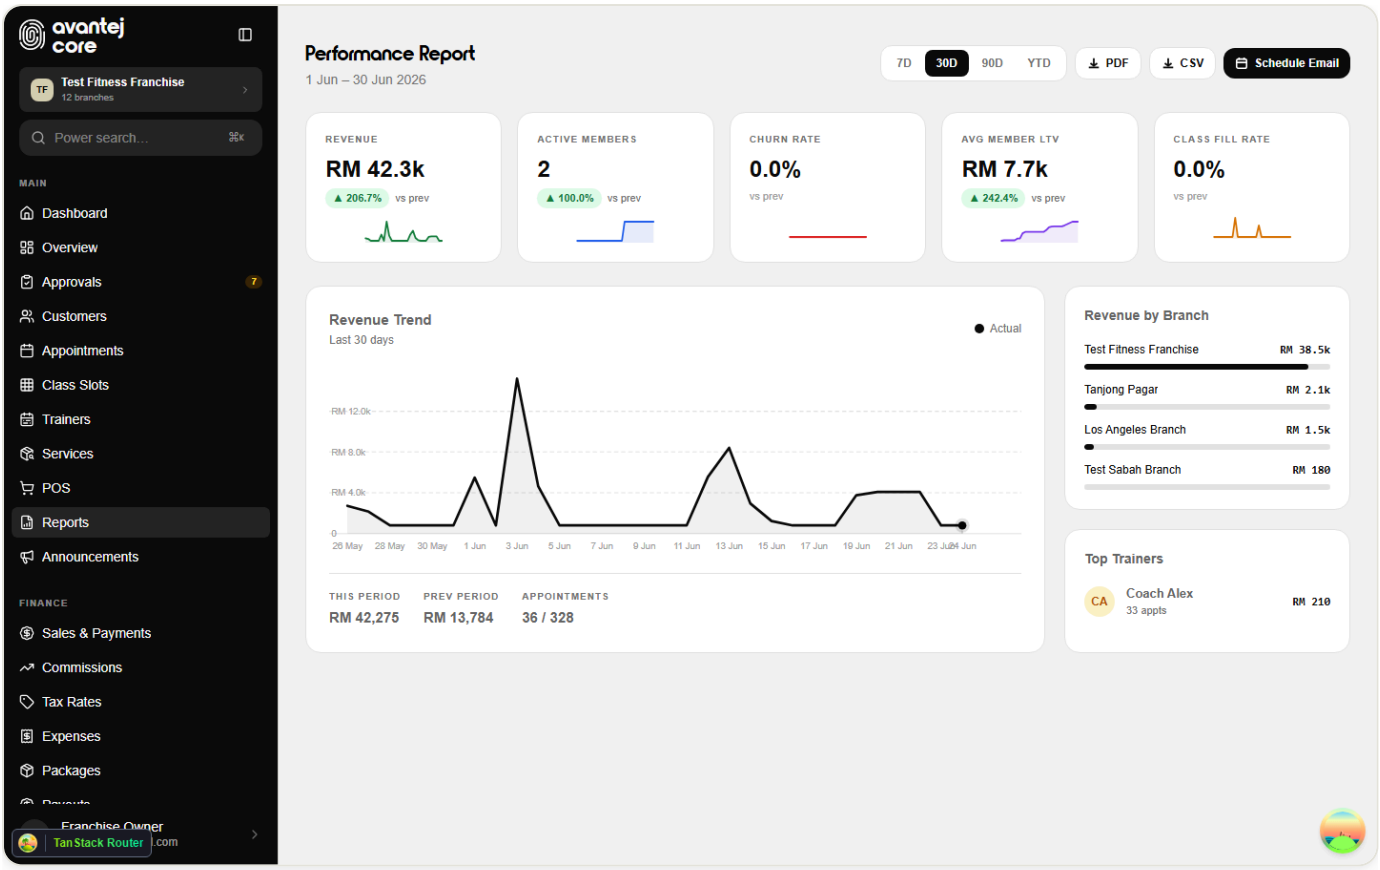

- **Post an announcement** — create, edit, or delete.
- **Read your notifications** and mark them read (one or all).
- **Set your notification preferences** — what you get alerted about.

---

19. Reports

Understanding how the business is doing.

`Sidebar → Reports · Overview`

Business reports and analytics.

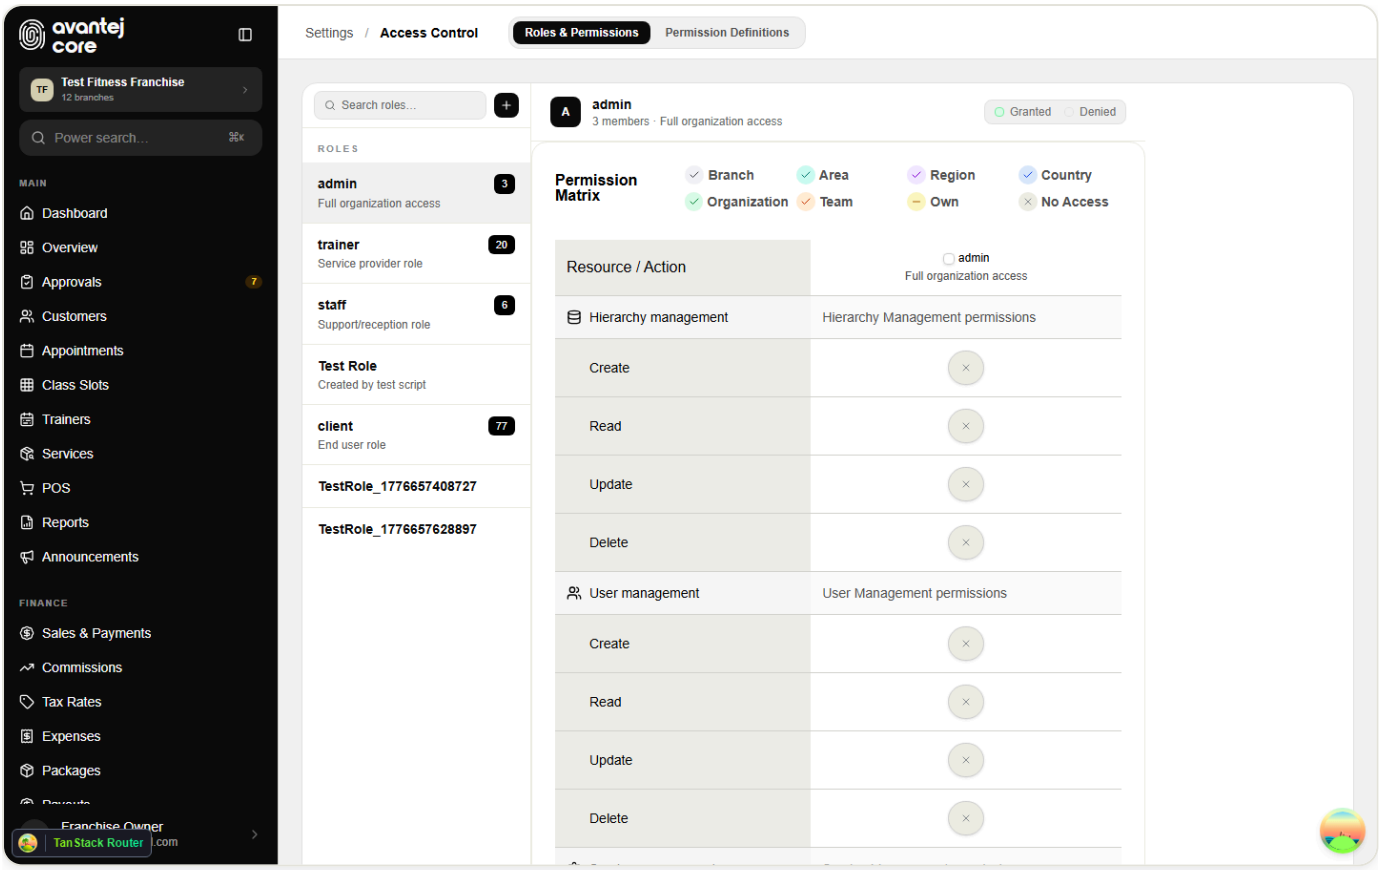

- **View business KPIs** on the dashboard overview by period.
- **Open detailed reports** for sales, commissions, and more.
- **Schedule reports** to be emailed automatically — create, toggle, or delete schedules.

---

20. Staff Access & Roles

Controlling who can do what.

`Sidebar → Access Control`

Define roles and control what each one can access.

- **Create and edit roles** (e.g. Cashier, Manager) and delete unused ones.
- **Set each role's permissions** — add or remove what they can access.
- **Assign roles to users**.
- **Invite new staff** by email — resend, revoke, or accept invitations.

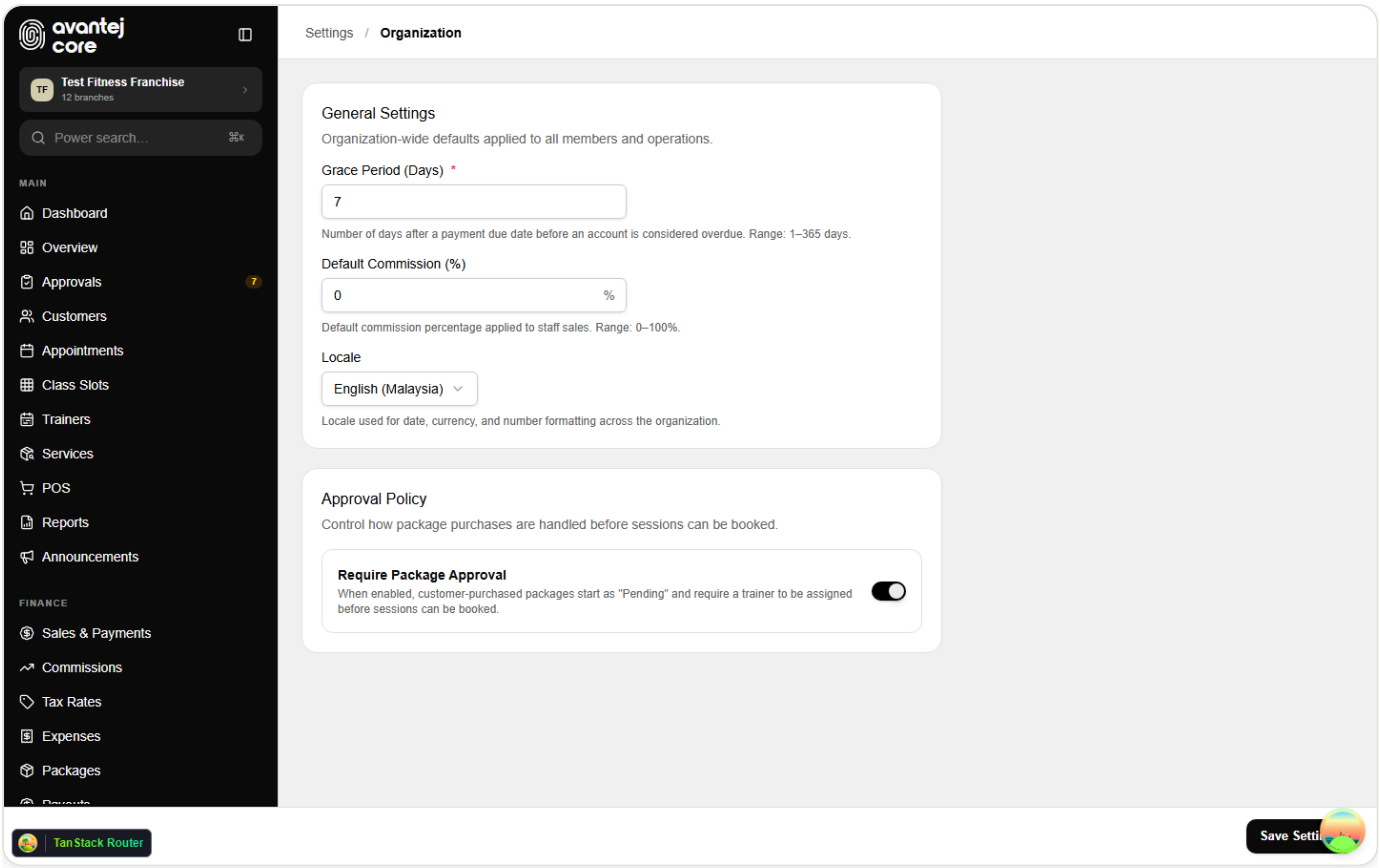

> **Tip:** System administrators bypass all permission checks. After changing someone's permissions, they may need to sign out and back in to see the change.

---

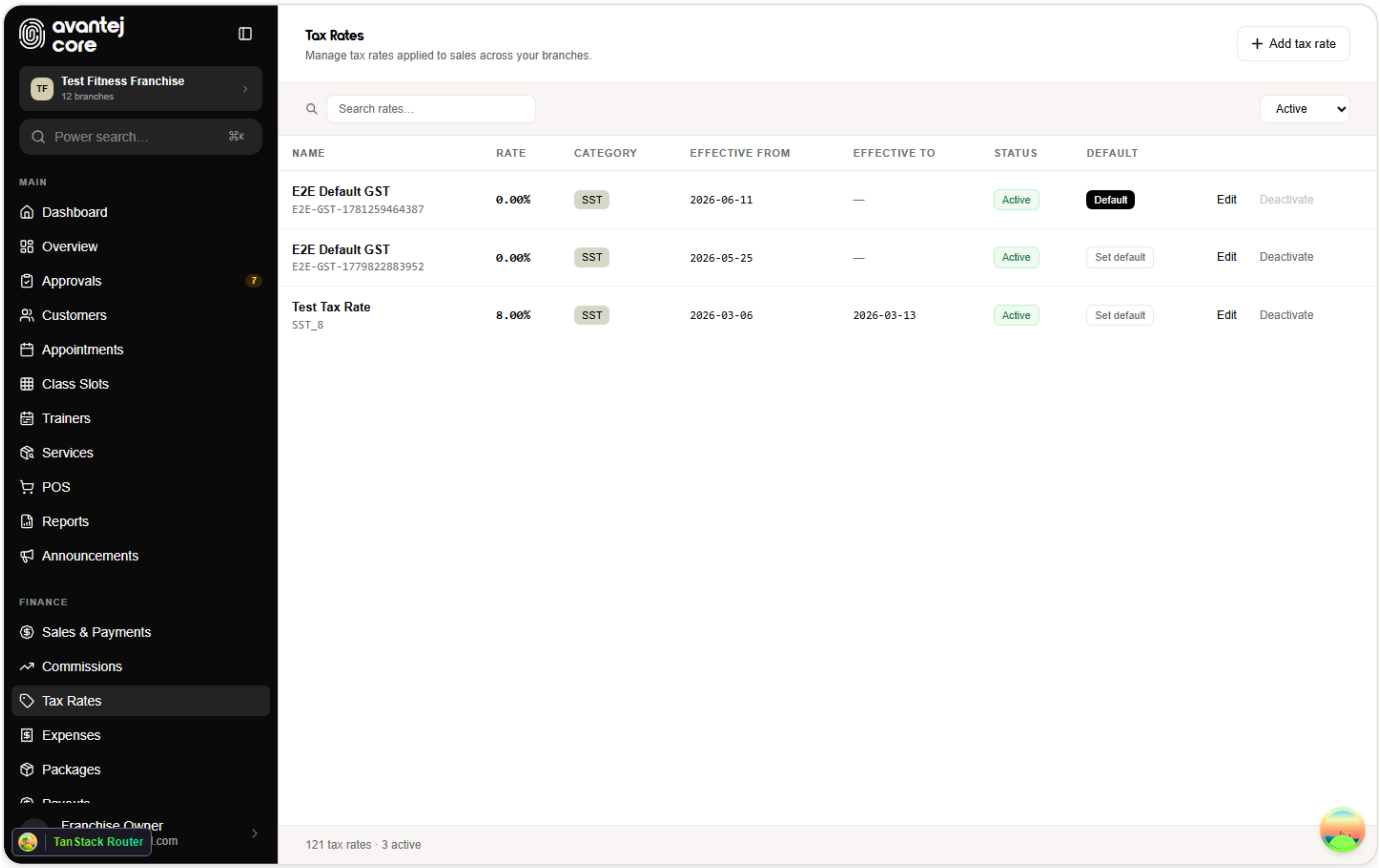

21. Settings & Integrations

Configuring how the gym runs.

`Sidebar → Settings`

Organisation settings — your gym's profile and configuration.

Tax rates — create rates and set a default for sales.

- **Organisation profile** — your gym's name, branding, and details.

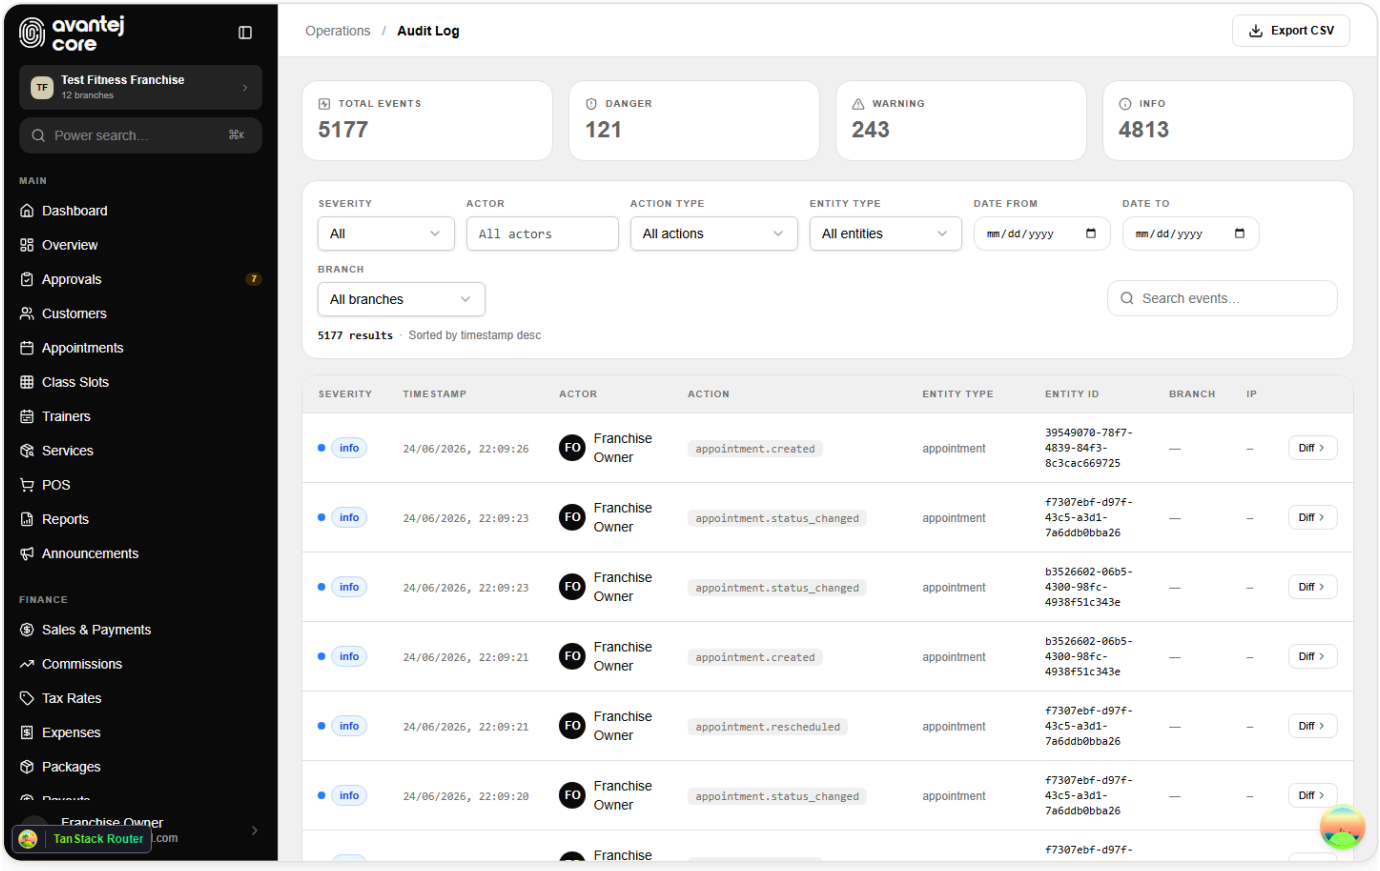

- **Branches & rooms** — create branches, manage rooms and locations.
- **Tax rates** — create rates, set a default, deactivate.
- **Installment plans & commission cycles** — payout schedules and plan templates.
- **Email settings** — verify sending domains, manage aliases, and route notifications.
- **Google Calendar** — connect, sync, or disconnect.
- **GoHighLevel (CRM)** — connect your organisation or a branch and retry failed syncs.

---

22. Audit Log

A record of who did what.

`Sidebar → Audit`

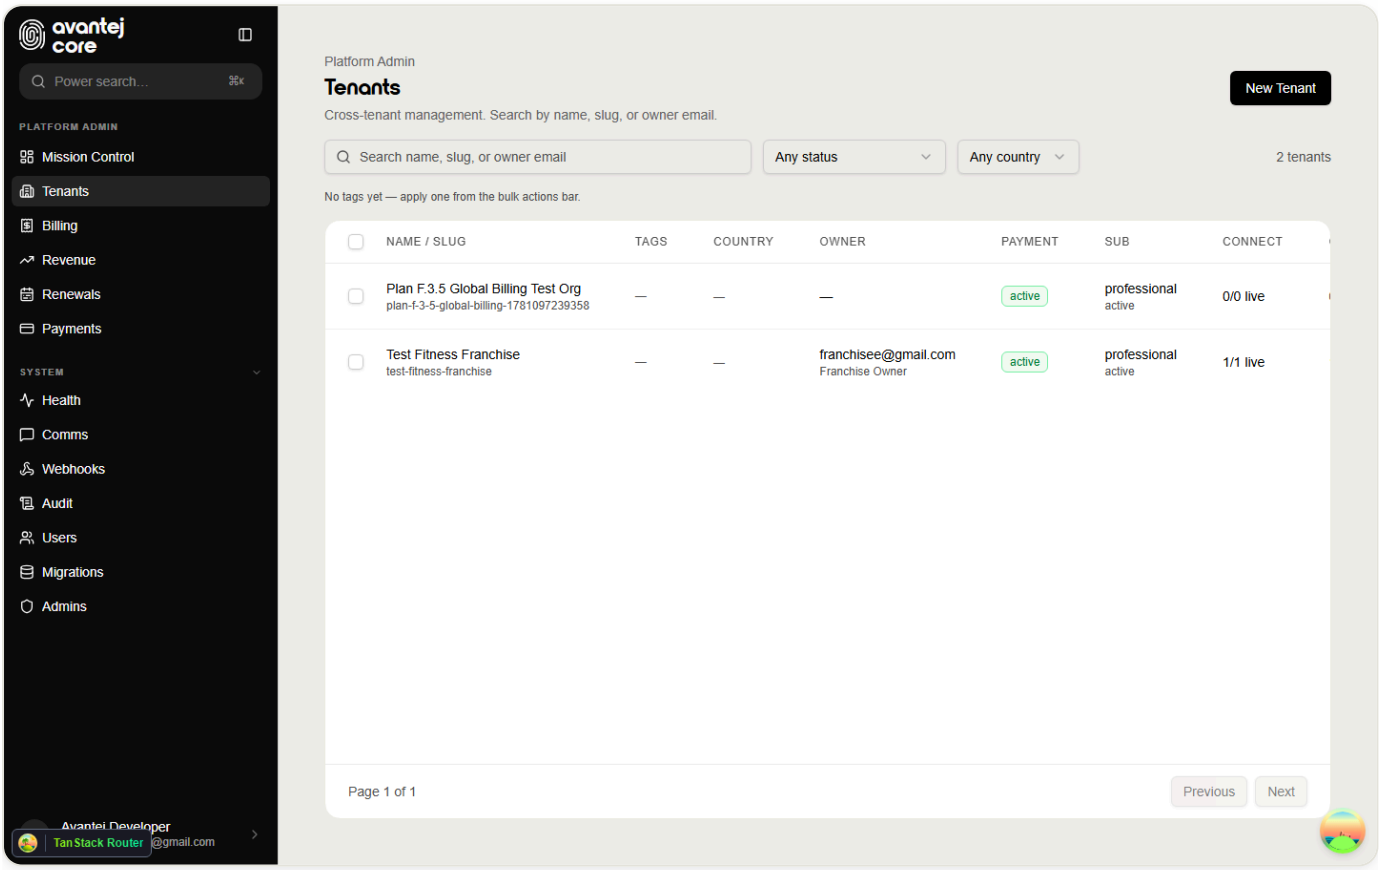

A searchable record of who did what, exportable to CSV.

- **View the audit log** of actions taken in the system.
- **Filter to one customer's history**.
- **Export the log** to a CSV file.

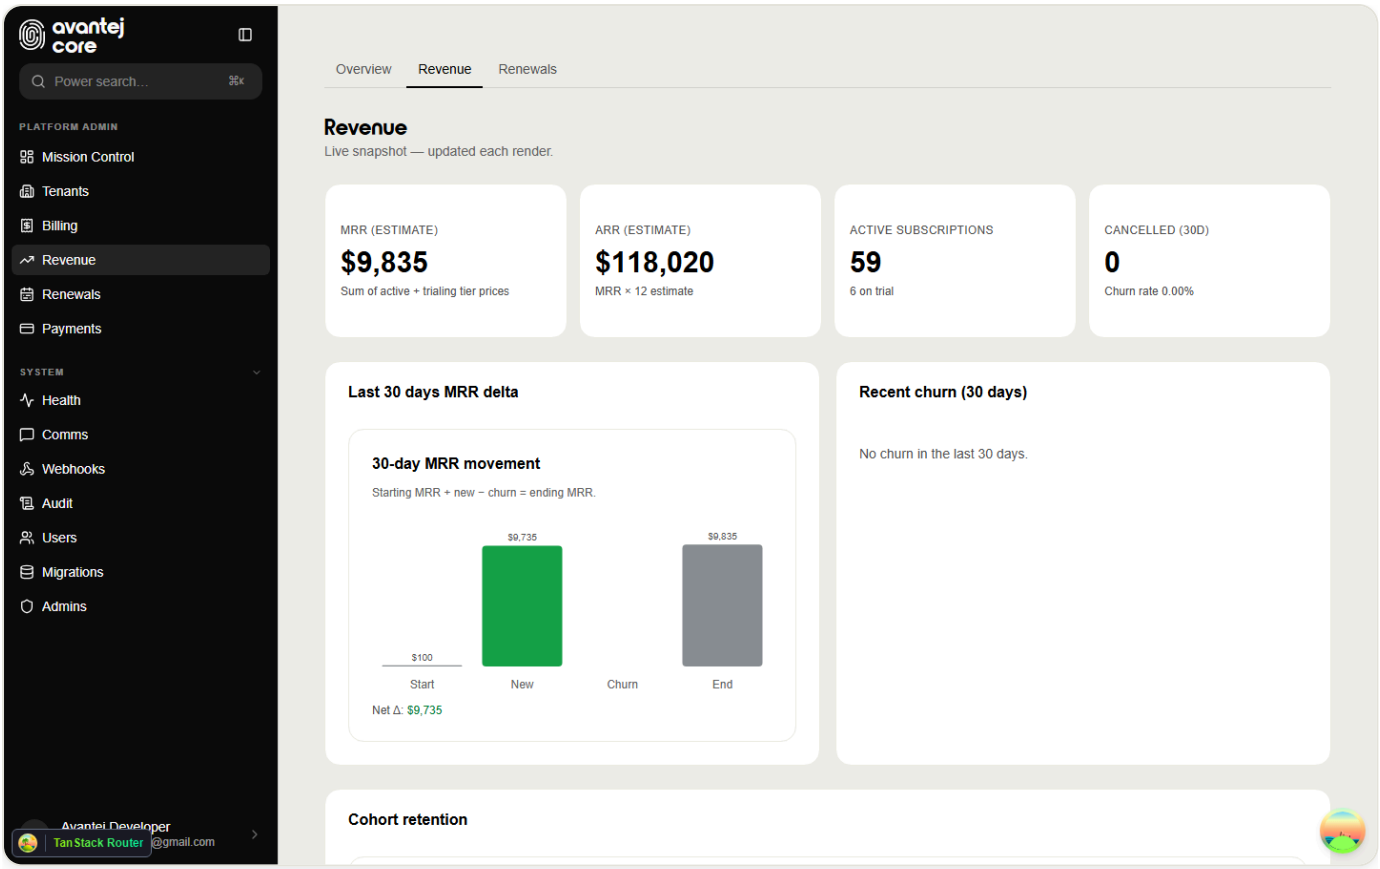

23. Platform Administration

For Avantej operators who manage multiple gyms (tenants). Most gym staff will not see this area.

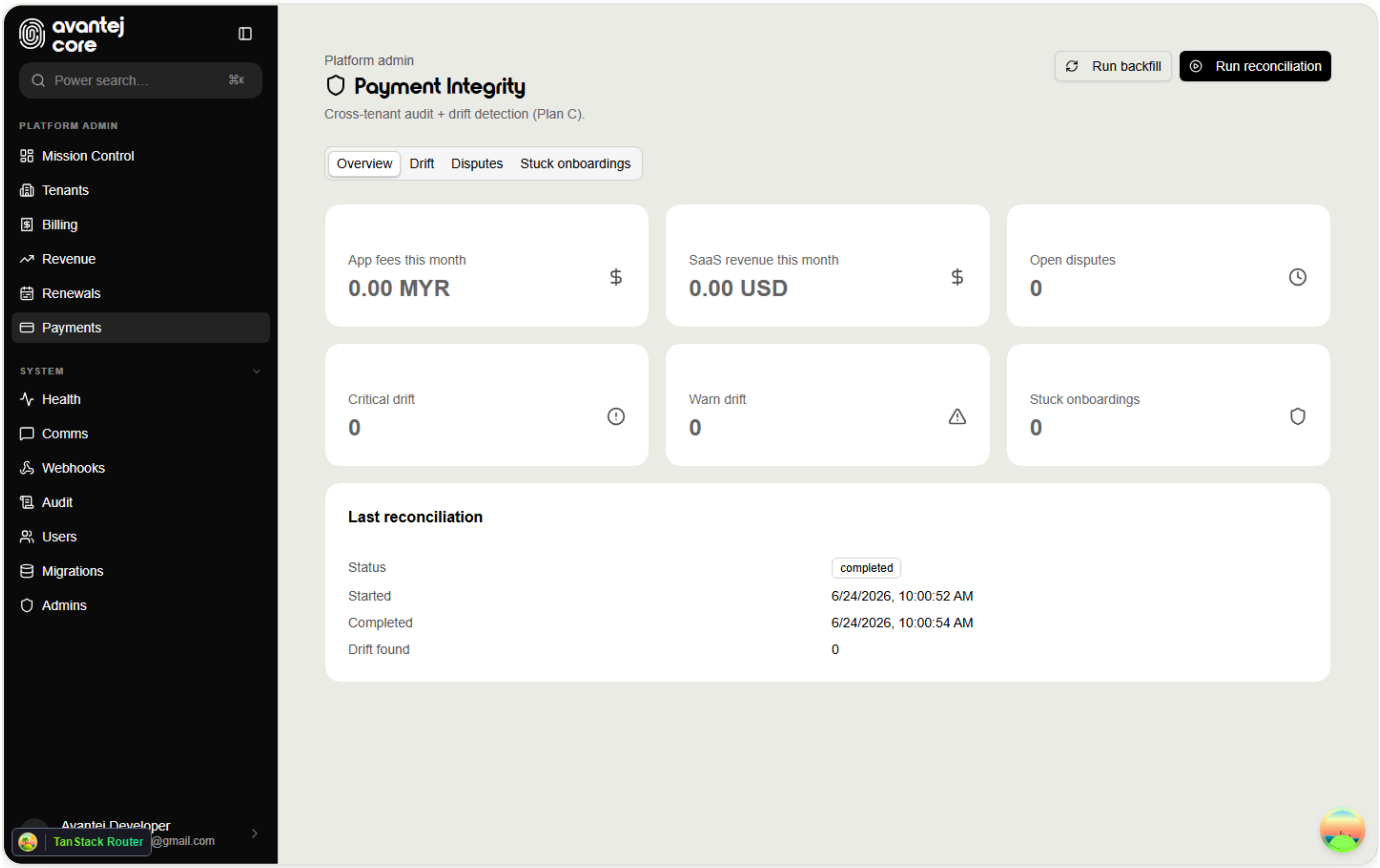

`Sidebar → Platform Admin`

Cross-tenant management — every gym on the platform, with its own admin menu.

Platform revenue KPIs, churn, and cohort retention.

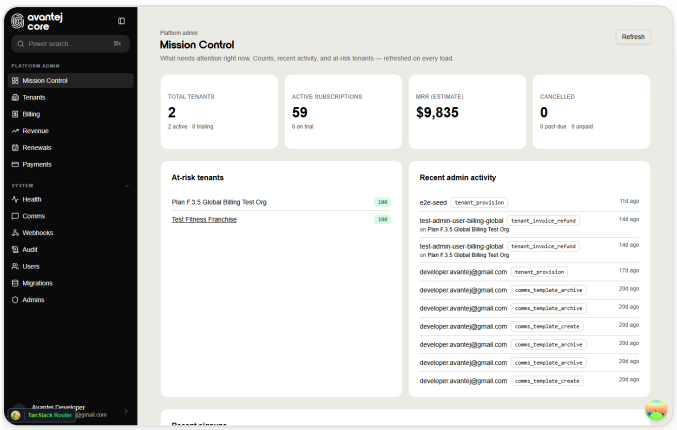

Payment oversight — disputes, drift, and reconciliation.

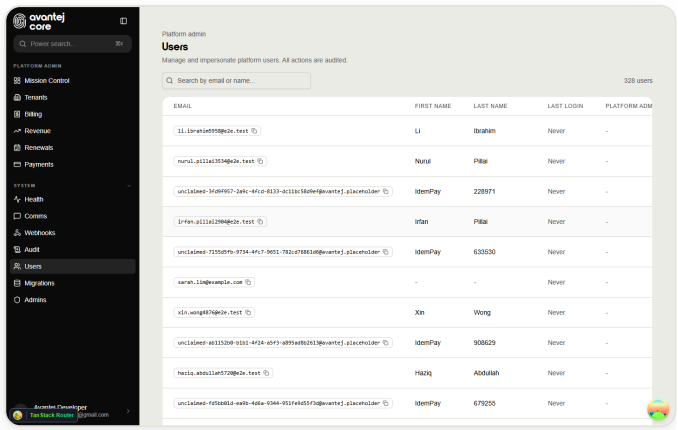

- **Manage tenants** — provision, suspend, resume, cancel, issue credit, or re-trial a gym; request exports and deletions.

- **Billing & coupons** — view billing, create and apply coupons.
- **Communications** — send direct messages and announcements (single or bulk), manage email templates.
- **Payments oversight** — handle disputes, payment drift, and run reconciliation.
- **Revenue & health** — revenue KPIs, churn, cohort retention, renewal calendar, health scoreboard.
- **System** — review migrations, webhook events, and audit actions; impersonate a user for support.

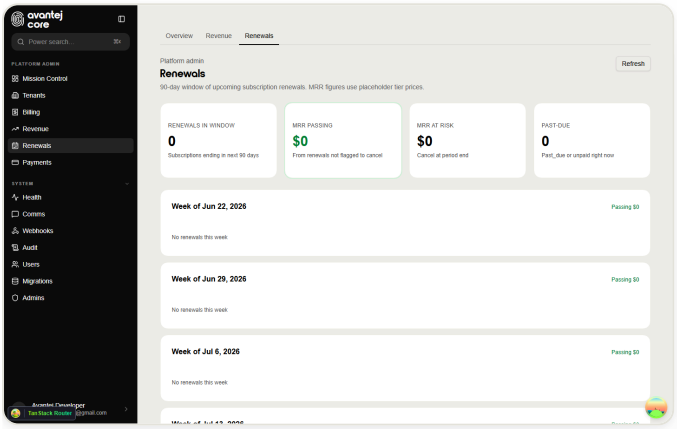

More platform admin screens

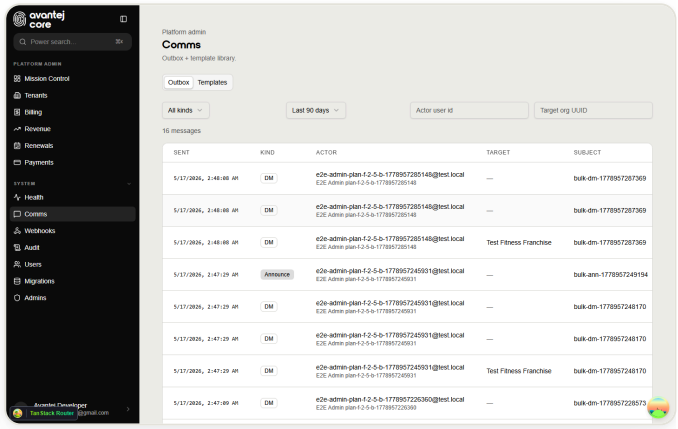

Mission Control — platform dashboard

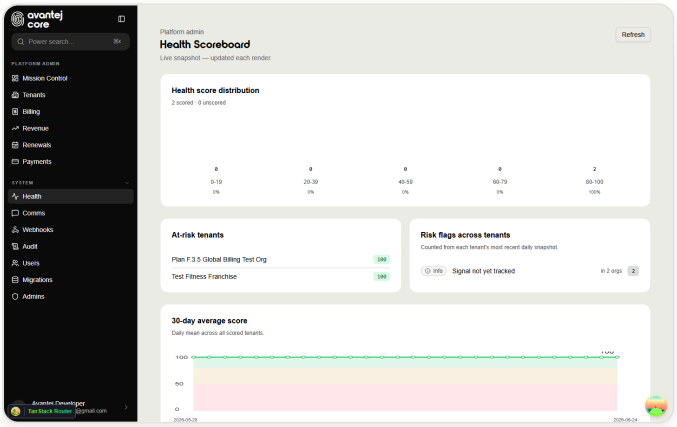

Users — across all tenants

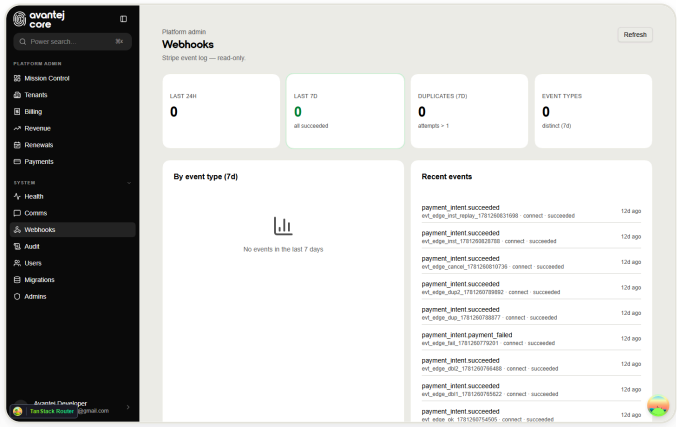

Renewals — subscription calendar

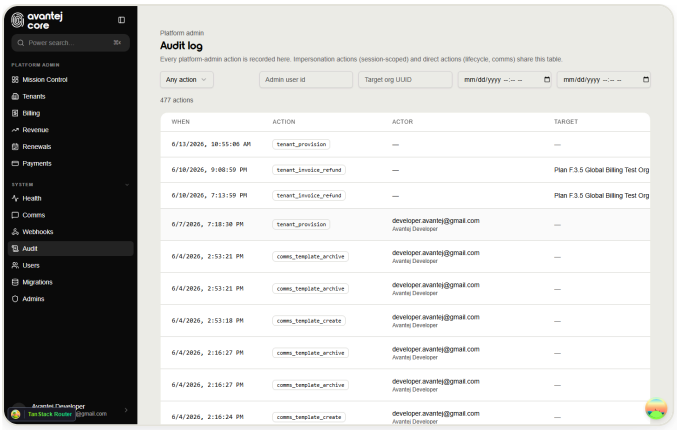

Comms — messages & templates

Health — system scoreboard

Webhooks — event log

Audit — admin action log
