Par-Q & You

Important Notice:

A complete PAR-Q & YOU form is available upon request and will be sent to your email. Please carefully read the following statements. If you disagree with any statement or find it untrue, do not sign this document. Instead, fill in the PAR-Q & YOU form and have your doctor complete the MEDICAL CLEARANCE FORM attached to your email. Submit these forms to your coach before your next session unless you agree to the statements below and have signed the document.

Guidance:

Use common sense when agreeing to the statements below:

1. Your doctor has never told you that you have a heart condition and that you should only perform physical activities recommended by a doctor.
2. You do not feel chest pain when engaging in physical activity.
3. You have not experienced chest pain in the past month when not engaging in physical activity.
4. You do not lose your balance due to dizziness and have never lost consciousness.
5. You do not have any chronic bone or joint problems (e.g., back, knee, or hip) or pain radiating from any part of your body that could be worsened by changing your physical activity level.
6. Your doctor or physician is not currently prescribing medication for your blood pressure or heart condition.
7. You do not know of any other reason why you should not engage in physical activity.

If you agree to all the statements above:

- **Start Slowly:** Begin increasing your physical activity gradually. This is the safest and easiest way to start.
- **Fitness Appraisal:** Participate in a fitness appraisal to determine your basic fitness level. This will help plan the best way for you to start becoming more physically active. It is also recommended to have your blood pressure checked. If your reading is over 144/94, consult your doctor before becoming more physically active.

If you disagree with any of the statements above:

- **Consult Your Doctor:** Speak with your doctor by phone or in person before starting any physical activity or undergoing a fitness appraisal.
- **Discuss the PAR-Q:** Inform your doctor about the PAR-Q and the questions you answered “No” to.
- **Communicate:** Talk with your doctor about the types of activities you wish to participate in and share this information with your coach.
